What is the toilet rebate program:

- The program will assist home and multi-family property owners that are billed on a residential rate structure with costs related to replacement of their older (pre-1992), non-conserving toilets or urinals with new high efficiency models. This program is subject to budget funding each fiscal year. Rebates are “first come, first served” and will continue until all toilet and urinal rebates have been awarded each funded year.
- The City of Roseville will rebate up to \$100.00 for High-Efficiency toilet(s) installed in single-family and multi-family residences. The rebate is for replacement of complete toilets (tank and bowl) that use 3.0 or more gallons per flush (GPF) with a HET (1.28 GPF) toilet(s).
- Covered rebate expenses include the tank, bowl, urinal, supply line, wax ring, caulking, seat, bolts, bolt covers, tax, and professional installation. The maximum rebate will not exceed \$100.00 per HET (1.28 GPF) toilets(s).

Who is eligible to participate in this program:

- City of Roseville residential water customers with toilets and/or urinals that use 3.0 gallons or more per flush (GPF). The City of Roseville is not responsible for equipment purchased or work performed in conjunction with this program.
- A guideline to help you determine if your toilets use 3.0 or more GPF is as follows: Toilets manufactured in the pre-1970 era use 7.0 gallons of water each time they are flushed. Pre-1980 toilets use 5.5 gallons per flush and post-1980 to 1992 toilets use between 5.5 and 3.5 gallons per flush. Urinals manufactured 1992 and earlier use 3.0 gallons per flush. The Water Efficiency Specialist can help you determine the flush volume if you are not sure of the age or size of your existing toilet(s).

How to participate:

- Call the City of Roseville Water Efficiency Division at 774-5761 to confirm if rebates are still available.
- A list of qualifying 1.28 HET or Dual Flush models can be found at www.epa.gov/watersense/pp/het.
- Submit a completed application form and copy of receipts within 90 days of purchase to the Water Efficiency Division at 2005 Hilltop Circle Roseville CA 95747. Applications are available at www.roseville.ca.us/rebates or by calling (916) 774-5761.
- After the application has been received a Water Efficiency Staff member will contact you to set up an inspection date and time.
- Do not destroy your existing high flush toilets until an inspection has been performed.

If you have questions about this program or would like more information on other Water Efficiency programs the City of Roseville offers, please feel free to contact us at (916) 774-5761 or visit us on our web site at www.roseville.ca.us/rebates.
