

Business/Commercial Solar Installation Application PV Installation 1.0 kW - 1,000 kW **Form B**

Form B - To be signed by the Customer-Generator

SECTION ONE - General Information

Complete all sections and sign this form. Submit the completed Form B to Roseville Electric Utility after the PV system has been installed. This form shall be signed and returned to Roseville Electric Utility before the system can be approved for interconnection.

Customer-Generator Information		
Name (as appears on electric bill)	Roseville Electric Utility Service Account #	
Installation Address (street and zip)	Telephone	E-Mail
Check Contract Type		
Owned	Leased	PPA
Solar Lending Company / PPA Company / 3 rd Party Ownership Information		
Name of Company	Telephone	Fax
Mailing Address (street, city and zip)	City of Roseville Business License #	
Contact Name	Contact Phone	Contact E-Mail
Solar System Installer		
Name of Company	Telephone	Fax
Mailing Address (street, city and zip)	City of Roseville Business License #	Contractor's License #
Contact Name	Contact Phone	Contact E-Mail
Solar System Information		
Number of Panels	CEC AC System Watts	Installation Date

SECTION TWO - General Requirements for Interconnection & Access to Net Metering Tariffs

It is recommended that all applicants and their contractors obtain a copy of Roseville Electric Utility's [Rule 21](#) and the [Roseville Electric Utility Construction Standards](#) from Roseville Electric Utility's web site and read and understand all interconnection and program requirements. Rule 21 compliance is a requirement of the City of Roseville municipal code. Failure to abide by these requirements could result in a PV system being locked off, delaying interconnection approval. All systems installed in parallel to Roseville Electric Utility's distribution grid must meet Rule 21 requirements.

Important highlights of Rule 21; see the [Rule 21](#) document for complete details:

- **Net Metering** - Per Roseville Municipal Code, access to the rate is conditioned upon the Customer-Generator meeting all Rule 21 equipment and operational standards. Failure to do so may result in the loss of access to solar net metering.
- **Permission to Interconnect** - Roseville Electric Utility shall have the right to lock-off or disconnect the solar energy system from Roseville Electric Utility's system until Rule 21 compliance is met and the building inspector has approved the solar installation. The customer may be subject to fines if the system is operated without interconnection permission.
- **Safe Operation of your Solar Energy System** - If at any time Roseville Electric Utility determines that the solar installation or its operation may (a) endanger Roseville Electric Utility personnel and/or (b) endanger the safe and reliable operation of Roseville Electric Utility's electrical system, Roseville Electric Utility shall have the right to disconnect the solar energy system from Roseville Electric Utility's system. The system shall remain disconnected until Roseville Electric Utility is satisfied that the unsafe condition(s) have been corrected.
- **Meter Access** – The electric meter must remain unobstructed by locked gates or pets.

January 2017

Business/Commercial Solar Installation Application

PV Installation 1.0 kW - 1,000 kW **Form B**

The Customer-Generator must initial each of the items below.

Initial here _____	I agree to abide by the terms set forth in the Roseville Electric Utility Residential Solar Energy Program Guidebook and Rule 21 for system interconnection with Roseville Electric Utility.
Initial here _____	The Contractor listed in the Roseville Electric Utility Residential Solar Energy Program Installation Application (FORM A) is authorized by the Customer-Generator to receive confidential Customer-Generator account billing and electric usage information pertaining to this installation.
Initial here _____	<u>Customer-Generators must not operate their solar energy until they receive the signed Interconnection Approval, Form C, from Roseville Electric Utility and the net meter has been installed.</u>

By initialing the boxes above and signing this agreement below:

- 1) Customer-Generator authorizes Roseville Electric Utility to release information to the contractor named in Form A regarding Customer-Generator usage and billing information, solar energy system location, size and operational characteristics as requested in the course of this interconnection process.
- 2) Roseville Electric Utility is granted permission to share information with authorized recipients for a period of three years from the date this agreement is received by Roseville Electric Utility.
- 3) In addition, Customer-Generator authorizes Roseville Electric Utility to release to the California Energy Commission information regarding Customer-Generator's facility size and operational characteristics (excluding Customer-Generator name, contact information, other personal information and solar energy system location) as requested pursuant to the California Energy Commission's rules and regulations.

SECTION THREE - Interconnection Terms & Conditions

Terms and Conditions -The undersigned declares under penalty of perjury that:

- The site installation is located within the service territory of Roseville Electric Utility.
- The above described generating system is intended primarily to offset part or all of the Customer-Generator's electrical needs at the site of installation.
- The Customer-Generator agrees to abide by the terms set forth in the Roseville Electric Utility Commercial Construction Standards and Rule 21 for system interconnection with Roseville Electric Utility.
- The Customer-Generator understands that Roseville Electric Utility commercial general service electric rates and rate structure may change over time and the current applicable rates will apply.
- The Customer-Generator agrees the selection, purchase, and ownership of the equipment are his or her sole responsibility. Roseville Electric Utility makes no representation as to the safety, reliability and/or efficiency of the equipment selected or components thereof.
- Roseville Electric Utility makes no warranty, whether expressed or implied, including warranty of merchantability of fitness for any particular purpose, use or application of the equipment.
- The information provided in this form is true and correct to the best of his or her knowledge.

Customer-Generators must not operate their solar energy until they receive the signed Interconnection Approval, Form C, from Roseville Electric Utility and the net meter has been installed.
