City of Roseville Hazards Preparedness Questionnaire

The City of Roseville is beginning a planning process to identify, plan for and mitigate the risk and vulnerability to natural and human-cause disasters in our community.

Essential to this process is the knowledge of our citizens regarding potential hazards and techniques to reduce risk and loss from hazards. Also important is the local information you may have about areas in Roseville that are vulnerable to one or more hazards.

The information you provide will aid the City of Roseville Multi-Hazard Mitigation Plan Steering Committee in the coordination of preparedness and mitigation measures in Roseville.

Thank you for your time and participation in this important process.

HAZARD INFORMATION

1. In the past 10 years, have you or someone in your household experienced a natural or human-caused disaster within Roseville such as flood, household fire, or severe damage from a winter storm?

Yes

No (if no, skip to Question 2)

If yes, which of these types of natural or human-caused disasters have you or someone in your household experienced?

Flood

Household Fire

Windstorm

Winter Storm

Hazardous Waste Spill

Wildfire

Winter Storm

Earthquake

2. How concerned are you personally about the following natural or human-caused disasters impacting Roseville? All answers on scale of 1 to 5

Flood

Household fire

Wildfire

Drought

Wind Storm

Winter Storm

Earthquake

Hazardous Waste Spill

Act of Terrorism

3. Do you consider yourself prepared for the probable impacts of a natural or human-caused disaster?

3.a. Please rate how prepared you and your household are for the impact of a natural or human-caused disaster with 5 being the most prepared.

3.b.If yes, how have you prepared?

Emergency preparedness information from government source (federal, state, local emergency management)

Experience. We have been through an event one or more times.

Locally provided news or media information

Have attended meetings that have dealt with disaster preparedness

I am a member of the Community Emergency Response Team (CERT)

Other

4. What do you feel is the most effective way to receive information to make your family and home safer from natural and human-caused disasters?

Printed Media:

Newspaper

Telephone book

Other – text box.

5. Is your property located in a designated floodplain?
6. Do you have flood insurance? Yes or No
7. If no, what is the primary reason you do not have flood insurance?
 - Do not need it. My property has never flooded.
 - My homeowners insurance policy will cover flooding
 - Not worth it
 - Not familiar with it/don't know about it
 - Other _____
8. Do you have earthquake insurance? Yes or No
9. If no, what is the primary reason you do not have earthquake insurance?
 - Too expensive
 - In my opinion risk of earthquake in Roseville does not warrant insurance
 - Not available
 - Deductibles too hit
 - Not familiar with it/don't know about it
 - Other _____

HAZARD MITIGATION

The term mitigation means to make something less harsh or severe. Mitigation activities are actions you can take to protect your home and property from hazards such as flood and fire.

The purpose of the City of Roseville Multi-Hazard Mitigation Plan is to list mitigation activities for those hazards most likely to occur in our community. The plan will aid the City of Roseville and other responsible agencies to protect life and property from the impacts of future natural and human-caused disasters.

The following questions will allow those preparing the City's plan determine the knowledge Roseville citizens have about mitigation activities to protect from natural and human-caused disasters.

10. Did you consider the possible occurrence of natural hazards when you purchased or moved into your current home? Yes or No
11. Was the presence of hazard risk zones (ie. Floodplain, proximity to railyard, etc.) on your property disclosed to you by your Real Estate agent when you purchased your home? Yes or No
12. Would you be willing to spend money on your current home to retrofit it from the impacts of future hazard events? (Examples of retrofits include bolting foundations and anchoring shelving and utilities for earthquake protection). Yes or No
13. How much money would you be willing to spend to better protect your family and home from impacts of potential hazards?

- \$5000 and above
- \$2500 to \$4999
- \$1000 to \$2499
- \$500 to \$999
- \$100 to \$499
- less than \$100
- Nothing
- Don't know
- Other

14. Which of the following incentives would motivate you to spend money to retrofit your home from the impacts of potential future natural or human-caused disasters?

- Insurance Discount
- Building Permit (fee waiver or reduction)
- Mortgage Discount
- Property Tax break or incentive
- Low interest rate loan
- Grant funding that pays for portion of retrofit
- Other (please explain)

Demographic Questions – standard questions to be included in final survey by DataCycles.

1. Age
2. Gender
3. Level of Education
4. ZIP Code
5. Length of Residence
6. Own or rent
