

# Dry Creek Greenway **West** Planning & Feasibility Study

*A MULTI-USE TRAIL ALONG DRY CREEK, FROM COOK RIOLO ROAD TO RIVERSIDE AVENUE*

## Study Corridor

In collaboration with Placer County, Placer County Transportation Planning Agency (PCTPA), and the Rails-to-Trails Conservancy, the City of Roseville is studying the feasibility of Dry Creek West, a 3-mile, multi-use trail between Cook Riolo Road and Riverside Avenue.

## Let us know how you use trails.

Take the brief online questionnaire through Monday, April 23.

PLACER COUNTY  
TRANSPORTATION  
PLANNING AGENCY

## Connections

This potential trail would ultimately connect with the Dry Creek Greenway East (Riverside Avenue to Old Auburn Road), and regional trails such as those west of Cook Riolo Road in unincorporated Placer County and the American River Parkway.

## Benefits

Paved off-street trails provide active transportation and recreational opportunities for people of all abilities.

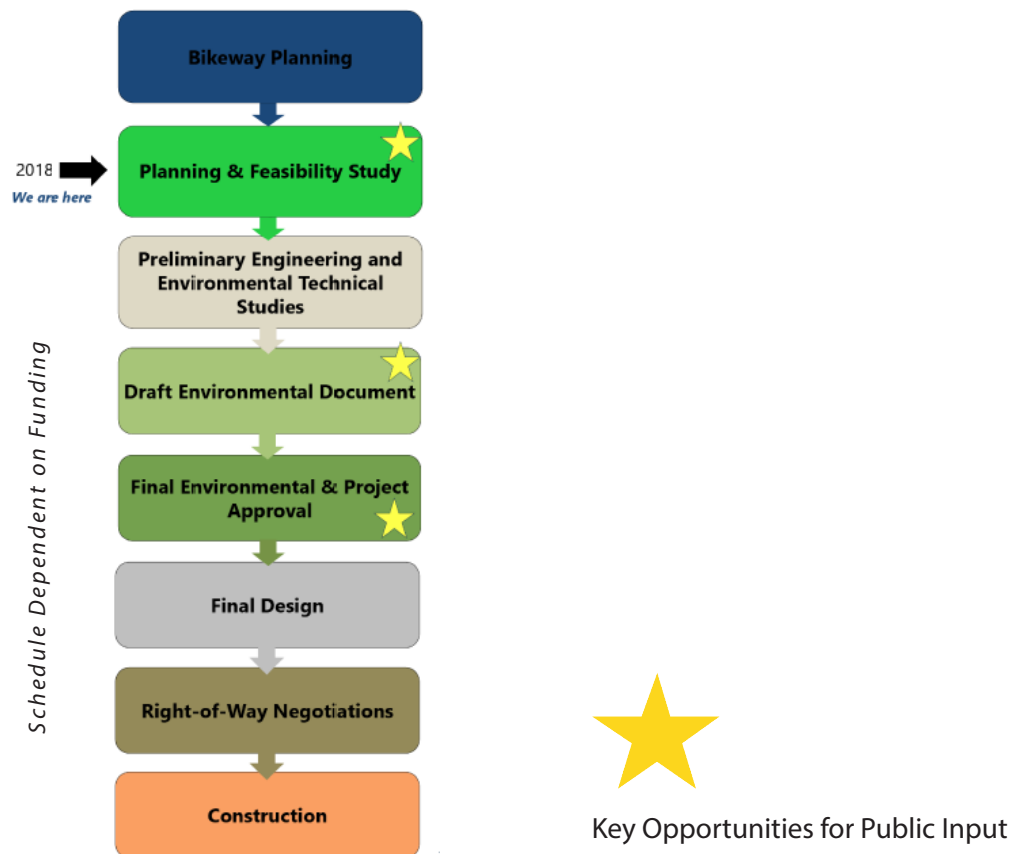

## Safety

Trail feasibility will consider emergency access, land uses, the environment, clear boundaries between the trail and private property, connections to destinations, and other factors.

## Study Funding

Funding for the Dry Creek Greenway West Planning and Feasibility Study is provided by a Caltrans' Sustainable Transportation Grant, Federal Transit Administration 5304 Grant, and local Transportation Development Act matching funds.

## Project Steps

## Stay Involved

Be sure to stay informed and sign up for project email updates. Continue to weigh in during more workshops, open houses, and virtual community workshops in 2018.
