Director's message: Building on success

For over one hundred years electric utilities changed very little. Their goal was simple, bring electricity to every home and business within their territory. Since the establishment of the Roseville Municipal Distribution System on August 13, 1912, Roseville Electric Utility has operated with that same principle purpose in mind.

However, today's world is much different than it was 111 years ago, so providing safe, reliable, and affordable electricity to our customers isn't as simple as it once was. The challenges we face today are ever-changing and include quick and unpredictable cost increases, stricter legislative mandates, supply chain and labor shortages, and accommodating increased loads during heat-related and other emergencies.

Despite the modern day obstacles we are up against, our customers remain the focal point of every decision and policy we implement. Our commitment to reliability and sustainability is unwavering and relentless; and, while it is proving more and more difficult to avoid rate increases, we devote every resource we have to ensuring the affordability of our service.

This is most evident when Roseville Electric rates are compared to neighboring utilities. Our customers save more than \$154 million per year compared to what they would pay if they were customers of a neighboring investor-owned utility. As a longtime and active member of the American Public Power Association, I am honored to be the director of a municipal power provider so innately devoted to ensuring customer satisfaction.

Accepting the position of Electric Utility Director for the City of Roseville was one of my proudest achievements and I do not take it lightly. I am not only dedicated to maintaining Roseville Electric's sought-after service level; I am actively working on policy-related activities and initiatives designed to improve the reliability and resilience of the electricity

sub-sector as a whole.

While I may not always agree with the mandates our highly-regulated industry has to comply with, I understand the importance of securing the physical and cyber security infrastructure and emergency preparedness of our nation's electricity sub-sector. The motivation behind devoting time and effort to national electricity concerns stems from my duty to continue Roseville Electric's uncompromising commitment to our customers.

As a publicly owned utility, we have a responsibility to shield our customers from the negative effects of circumstances they can't control. For this reason, we are always working to adjust and improve our processes to meet current demands.

Just as electrical current conquers resistive force to successfully arrive at its destination, Roseville Electric is adaptable, resilient, and equipped to overcome any challenge as we continue to grow and evolve.

Dan Beans

Roseville Electric Utility Director

Safeguarding the grid

In August 2021, Roseville City Council approved the California Department of Water Resources' (DWR) proposal to locate two mobile generating units at the Roseville Energy Park. The generation from the units is used to support the state's electricity grid during heat-related emergencies.

The units are to be deployed under emergency conditions as determined by the California Independent System Operator (ISO). The units are powered by natural gas and equipped with Selective Catalytic Reduction (SCR) systems to reduce emissions and limit air quality impacts. While they run on natural gas, they are capable of running on a blend of up to 75 percent hydrogen. Overall, the DWR program is designed to support the statewide grid over the next few years in its transition to a clean energy future.

In the case of heat-related emergencies, such as we experienced this last summer, the units can be online within five minutes at the direction of the California ISO. Roseville receives site and operating fees from DWR, and is fully reimbursed for all costs incurred.

At the end of the short term contract with the state, December 31, 2023, Roseville Electric Utility will have the option to purchase the mobile generating units. This option would provide additional reliability and supply stability for the residents and businesses of Roseville during periods of high electricity usage, and are capable of running on clean fuels.

As we look forward to opportunities at the end of the state contract, these additional natural gas resources could represent just a portion of our balanced portfolio of resources, and help Roseville in its effort to meet state clean energy goals while maintaining reliable service.

Keeping customers current

Roseville participated in the California Arrearage Payment Program (CAPP) that was the result of AB 135 (Committee on Budget, statutes of 2021) which provided publicly owned utilities and cooperatives with nearly \$300 million collectively to address past due electric bills as a result of the COVID-19 pandemic.

Roseville supported the passage of this legislation with the California Municipal Utilities Association (CMUA) and the Northern California Power Agency (NCPA).

As a result of this legislation, Roseville's Utility Billing Department settled over \$460,000 in past due customer balances. This effort was a one-of-a kind program that the legislature authorized in 2021 to help individuals in our community become current on their electric bills.

**On December 23, 2021
we applied the following
payments:**

821

Residential accounts

\$360,226.03

66

Commercial accounts

\$104,438.46

887 total accounts

\$464,664.49

Advocating for our community

The City of Roseville Government Relations staff works collaboratively with the City's internal and external partners to advance the City's interests with federal, state, regional, and local government entities through advocacy, coalition-building, and public education.

On behalf of our utility customers, Amber Blixt, Utility Government Relations Administrator, worked with California legislators and our trade associations to support legislation that reserved nearly half a million dollars to settle past due utility account balances for Roseville customers.

“The success of the California Arrearage Payment Program,” Blixt shares, “is a perfect example of why we do what we do. Our customers are the reason we come to work every day, so it’s always rewarding when we are able to help alleviate some of their stress or worry.”

Overcoming supply chain obstacles

Supply chain shortages are something we all became uncomfortably familiar with in 2022. Electric utilities nationwide, including Roseville Electric, were no exception. Put simply, the demand for transformers and the equipment needed to manufacture them has been outpacing production. Moreover, the prices of essential transformer parts have reached all-time highs.

There are a number of factors contributing to the shortages and price hikes, including nationwide development growth, storm response and preparedness, utility grid hardening projects, lack of manufacturing capacity, and labor shortages. Despite these obstacles, Roseville Electric is determined to remain prepared.

In response to the ongoing shortage of electric utility transformers, we established short and long term solutions with the primary goal of ensuring we continue to provide the safest and most reliable electric service to our existing customers. While we are committed to protecting our existing infrastructure, we also recognize the importance of planning for our future customers by supporting the economic and planned development of our City. Therefore, after careful planning and coordination with local developers and builders, and the North State Building Industry Association, we established the Roseville Electric Utility Transformer distribution plan for residential new construction.

In addition to initiating a distribution plan for the allocation and installation of newly received transformers, we implemented procedures to fortify our current infrastructure. Some of our short term resolutions include using up surplus supplies, harvesting unused supplies in the field, and collaborating with other utilities for product procurement. Longer term goals include increasing stock to strengthen our emergency preparedness, working with reputable distributors and suppliers, and communicating with policy makers to help develop viable workarounds.

Roseville Electric is not only committed to protecting our community from the impacts of the transformer shortage, we are using our resources to address the issues on a national level. Our Electric Utility Director, Dan Beans, is working with the Department of Energy on a special committee assigned to investigating the causes of the shortage, and tasked with developing practicable solutions.

No matter the endurance of the nationwide shortage, Roseville Electric will prove stronger and more resilient than ever before as we adapt our processes and continue to plan for our community's future.

Promoting pathways for utility careers

Utility Careers Field Day occurs twice a year and offers Roseville area high school students the opportunity to connect with Roseville Utility staff who demonstrate some of the job duties they undertake “in the field.”

Students interested in exploring utility careers are able to visualize a day in the life of various utility positions, while Roseville Utilities is able to promote employment opportunities. The day is led by Utility Exploration Center (UEC) staff and consists of a brief overview of four utility departments: electric, wastewater, water, and solid waste.

Students not only interact with utility workers and learn more about each profession from the professionals, they operate equipment and get a hands on understanding of different utility job duties. In the post-trip survey, one student wrote that they especially “enjoyed learning about all of the possible careers in utilities from the people in those professions.”

Electric Utility linemen host students at the Roseville Electric training yard where they demonstrate a series of electric-specific tasks, including pole-climbing, hot stick operation and the “backyard machine.” When asked about this year’s field day, Jason Grace, Roseville’s Electric Operations Manager, said “My team is always excited for this occasion. They enjoy telling the students about their experiences. They particularly like describing how fulfilling their work is and how they reached their current position through hard work and dedication without a college degree.”

Students are also given a tour of the Electric Engineering office building where Roseville Electric Engineers share what it’s like to design and maintain our electric system. The engineering office tour includes the dispatch center where students learn about the technology behind electrical outage detection and reporting.

Throughout their visits to the different Electric Department divisions, the students were extremely

engaged and eager to learn more about each profession. We are hopeful the ripple effect of these positive impressions will translate into future employees.

After the success of this year’s field days, Brayden Mitchell, the UEC Interpretive Services Supervisor, said “this event is turning out to be more enriching and popular than we imagined, for everyone involved. I am so proud of my team and thankful for the opportunity to collaborate with our utility partners.”

“The hands-on experiences are what put the trip over the top, students loved it and I enjoyed it just as much (if not more) than they did.”

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

JUNE 30, 2022 AND 2021

FINANCIAL STATEMENTS

Focused
on YOU

THIS PAGE INTENTIONALLY LEFT BLANK

INDEPENDENT AUDITORS' REPORT

To the Honorable Mayor and Members of the City Council
Electric Department
City of Roseville, California

Report on the Financial Statements

Opinions

We have audited the accompanying financial statements of the Electric Fund (the "Fund"), an enterprise fund of the City of Roseville, California (the "City") as of and for the year ended June 30, 2022, and the related notes to the financial statements, which collectively comprise the Fund's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, and the general fund of the Fund, as of June 30, 2022 and 2021, and the respective changes in financial position, and the budgetary comparison statement for the general fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Emphasis of Matter

As discussed in Note 1, the financial statements present only the Electric Fund, an enterprise fund of the City, and do not purport to, and do not present fairly the financial position of the City, as of June 30, 2022, the change in its financial position, or, where applicable, its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

To the Honorable Mayor and Members of the City Council
Electric Department
City of Roseville, California

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Reporting Responsibilities

Required Supplementary Information

Management has omitted accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

To the Honorable Mayor and Members of the City Council
Electric Department
City of Roseville, California

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated April 13, 2023 on our consideration of the Fund's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Fund's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Fund's internal control over financial reporting and compliance.

A handwritten signature in black ink that reads "Lance, Solt & Loughard, LLP". The signature is written in a cursive, flowing style.

**Electric Enterprise Fund
Management's Discussion and Analysis
June 30, 2022 and 2021**

Management of the Roseville Electric Enterprise Fund (Electric Fund), a fund of the City of Roseville (City) offers the following overview and analysis of the financial statements of the Electric Fund for the fiscal year ended June 30, 2022 and 2021. We encourage readers to utilize the information presented here in conjunction with the accompanying basic financial statements.

Overview of the Financial Statements

The Electric Fund's financial statements are divided into two sections: 1) basic financial statements, and 2) required supplementary information.

Included as part of the basic financial statements are the *Statement of Net Position*, *Statement of Revenues, Expenses and Changes in Net Position*, *Statement of Cash Flows*, and notes to the financial statements. The required supplementary information follows the notes to the financial statements and includes the schedules related to pensions and other post-employment benefits.

Financial Highlights

2022 compared to 2021

The Electric Fund's assets and deferred outflows of resources exceeded its liabilities and deferred inflows of resources by \$495.7 million, an increase of \$21.6 million or 4.6% over the prior fiscal year.

Total operating revenue was \$172.6 million, an increase of \$4.6 million or 2.7% compared to fiscal year 2021. Total operating expense was \$143.1 million, a decrease of \$5.9 million or -4.0%. Operating income was \$29.5 million. Payment in lieu of taxes of \$6.4 million was paid to the City as a franchise fee.

2021 compared to 2020

The Electric Fund's assets and deferred outflows of resources exceeded its liabilities and deferred inflows of resources by \$474.1 million, an increase of \$35.4 million or 8.1% over the prior fiscal year.

Total operating revenue was \$168.0 million, an increase of \$4.5 million or 2.8% compared to fiscal year 2020. Total operating expense was \$149.1 million, an increase of \$23.5 million or 18.7%. Operating income was \$19.0 million. Payment in lieu of taxes of \$6.2 million was paid to the City as a franchise fee.

Financial Analysis

The *Statement of Net Position* for the Electric Fund is as follows:

Condensed Statement of Net Position (In thousands)			
	FY2022	FY2021	FY2020
Assets			
Current Assets	\$ 249,742.3	\$ 233,149.5	\$ 218,772.4
Capital Assets	490,784.6	482,687.7	460,733.1
Non-current Assets	8,637.6	5,158.6	5,175.9
Total Assets	749,164.4	720,995.8	684,681.4
Deferred Outflows	22,496.3	29,373.9	38,241.2
Liabilities			
Current Liabilities	43,838.2	28,128.5	24,432.0
Non-Current Long-term Debt	141,642.7	149,590.5	158,248.2
Long-term Liabilities	63,676.5	92,599.3	93,619.7
Total Liabilities	249,157.5	270,318.3	276,299.9
Deferred Inflows	26,771.7	5,936.8	7,887.8
Net Position			
Net Investment in Capital Assets	348,510.4	331,397.0	300,364.0
Restricted:			
Benefit of Rate Payers	11,415.4	13,609.7	19,164.4
Debt Service	15,087.3	16,084.2	16,099.6
Unrestricted	120,718.6	113,023.7	103,106.9
Total Net Position	\$ 495,731.7	\$ 474,114.6	\$ 438,734.9

2022 compared to 2021

As of June 30, 2022, the Electric Fund's total assets increased by \$28.2 million or 3.9% compared to the prior year, primarily due to increases in restricted cash and investments in City Treasury, Investment in NCPA reserves, lease receivable, and capital assets, net of depreciation offset by the decrease in accounts receivable and prepaids. Deferred outflows of resources decreased \$6.9 million primarily due to decreases in the accumulated fair value of hedging derivatives, deferred amounts related to pension and deferred charge on refunding, offset by increase in deferred amounts related to OPEB.

Total liabilities as of June 30, 2022, decreased by \$21.2 million or 7.8% compared to the prior fiscal year. This was due to decreases in accounts payable, outstanding debt, net OPEB liability, net pension liability, and derivative at fair value-liability offset by increase in deposit payable. Deferred inflows of resources increased by \$20.9 million primarily related to OPEB, pensions and leases.

2021 compared to 2020

As of June 30, 2021, the Electric Fund's total assets increased by \$36.3 million or 5.3% compared to the prior year, primarily due to increases in cash and investments in City Treasury, accounts receivable, prepaids, and capital assets, net of depreciation offset by the decrease in restricted cash and investments

with fiscal agent. Deferred outflows of resources decreased \$8.9 million primarily due to decreases in the accumulated fair value of hedging derivatives, deferred amounts related to OPEB and pensions offset by increase in deferred charge on refunding.

Total liabilities as of June 30, 2021, decreased by \$6.0 million or 2.2% compared to the prior fiscal year. This was due to decreases in outstanding debt, net OPEB liability, derivative at fair value-liability, unamortized bond premiums and compensated absence liabilities offset by increases in the net pension liability, accounts payable, and payroll and customer deposits. Deferred inflows of resources decreased by \$2.0 million primarily related to OPEB and pensions.

The *Statement of Revenues, Expenses, and Changes in Net Position* for the Electric Fund is as follows:

Condensed Statement of Revenues, Expenses, and Changes in Net Position			
(in thousands)			
	FY2022	FY2021	FY2020
Operating Revenue			
Sales Revenue	\$ 166,656.2	\$ 162,958.5	\$ 156,007.0

Net Position, Beginning	474,114.6	438,734.9	395,365.7
Net Position, Ending	\$ 495,731.7	\$ 474,114.6	\$ 438,734.9

2022 compared to 2021

The Electric Fund's operating revenue was \$172.6 million, an increase of \$4.6 million or 2.7% compared to the prior fiscal year. Sales revenue increased by \$3.7 million or 2.2% primarily due to increase hydroelectric surcharge and rate case increases. Of the approximate \$166.7 million total sales revenue, \$87.9 million was related to commercial customers and \$78.6 million to residential customers. Wholesale energy sales revenue totaled \$1.5 million in the current fiscal year, a decrease of \$1.4 million or 48.1% mainly due to decrease wholesale power sold. Other operating revenues increased by \$2.2 million, primarily due to mutual aids recovery, customer late fees and reconnect charges.

Total operating expenses were \$143.1 million, a decrease of \$5.9 million or 4.0% compared the prior fiscal year. Total production and purchased power expense was \$72.9 million, which represented 50.9% of operating expenses. Total distribution and transmission expense was \$27.0 million, which represented 18.9% of operating expense. Administrative and general expense amounted to \$11.6 million, a decrease of \$12.4 million or 51.6% less prior fiscal year mainly due to salaries and employee benefits. Customer accounts and public benefits expense was \$7.6 million, which represented 5.3% of operating costs. Depreciation expense was \$24.1 million, an increase of \$1.2 million or 5.2% over the prior fiscal year.

Consistent with the City Charter, the Utility may pay an in lieu franchise fee not to exceed 4% of expenses to the City General Fund as a Payment in Lieu of Taxes. This franchise fee transfer was \$6.4 million for FY2022, an increase of \$0.3 million or 4.6% compared to the prior fiscal year.

Investment earnings, including the net change in fair value of investments, were (\$10.5) million, a decrease of a \$10.8 million mainly by the decrease in the fair value of pooled investments.

Total capital contributions received was \$11.3 million, a decrease of \$17.4 million or 60.5%, primarily due to a \$8.6 million decrease in contributions from developers, a \$9.1 million decrease in contribution in aid of construction offsetting by a \$0.4 million increase in connection and impact fees.

Transfers out of the Electric Fund to the City for general rehabilitation projects were \$0.4 million.

2021 compared to 2020

The Electric Fund's operating revenue was \$168.0 million, an increase of \$4.5 million or 2.8% compared to the prior fiscal year. Sales revenue increased by \$7.0 million or 4.5% primarily due to increase customer usage. Of the approximate \$163.0 million total sales revenue, \$84.4 million was related to commercial customers and \$78.6 million to residential customers. Wholesale energy sales revenue totaled \$2.9 million in the current fiscal year, an increase of \$0.6 million or 26.5% mainly due to increase wholesale power sold. Other operating revenues decreased by \$3.0 million, primarily due to revenue from in greenhouse gas auction proceeds.

Total operating expenses were \$149.1 million, an increase of \$23.5 million or 18.7% compared the prior fiscal year. Total production and purchased power expense was \$69.8 million, which represented 47.0% of operating expenses. Total distribution and transmission expense was \$24.5 million, which represented 17.0% of operating expense. Administrative and general expense amounted to \$24.0 million, an increase of \$4.7 million or 24.6% over the prior fiscal year mainly due to salaries and employee benefits. Customer accounts and public benefits expense was \$7.9 million, which represented 5.0% of operating costs. Depreciation expense was \$22.9 million, an increase of \$15.0 million or 190.2% over the prior fiscal year.

Consistent with the City Charter, the Utility may pay an in lieu franchise fee not to exceed 4% of expenses to the City General Fund as a Payment in Lieu of Taxes. This franchise fee transfer was \$6.2 million for FY2021, a decrease of \$0.1 million or 2.5% compared to the prior fiscal year.

Investment earnings, including the net change in fair value of investments, were \$0.3 million, a decrease of \$5.3 million due to a \$4.2 million decrease in the fair value of pooled investments, a \$1.3 million decrease in interest revenue, and a \$0.2 million less loss from sale of property.

Total capital contributions received was \$28.7 million, an increase of \$7.2 million or 33.3%, primarily due to a \$4.6 million increase in contribution from developers, a \$1.9 million increase in contribution in aid of construction, and a \$0.7 million increase in connection and impact fees.

Transfers out of the Electric Fund to the City for general rehabilitation projects were \$0.4 million.

Capital Assets

2022 compared to 2021

As of June 30, 2022 the Electric Fund's net utility plant and equipment, which includes investments in land, buildings, production and distribution facilities, and general items such as equipment and furniture, was \$490.8 million, an increase of \$8.1 million or 1.7% over the prior fiscal year.

2021 compared to 2020

As of June 30, 2021 the Electric Fund's net utility plant and equipment, which includes investments in land, buildings, production and distribution facilities, and general items such as equipment and furniture, was \$482.7 million, an increase of \$22.0 million or 4.8% over the prior fiscal year.

Capital Assets (In thousands)			
	FY2022	FY2021	FY2020
Land	\$ 5,173.0	\$ 5,173.0	\$ 5,173.0
Buildings & Improvements	31,067.9	25,677.7	25,677.7

Less: Accumulated Depreciation	(349,746.8)	(326,659.3)	(304,712.1)
Capital Assets, Net	\$ 490,784.6	\$ 482,687.7	\$ 460,733.2

Debt Administration

2022 compared to 2021

Total long-term debt, net of unamortized premium of \$4.1 million, was \$148.8 million at the end of FY2022. This represents a decrease of \$9.5 million or 6.0% compared to the prior fiscal year. The current long-term debt due within a year was \$7.2 million and non-current long-term debt was \$137.5 million. The debt is backed by the revenue of the Utility.

The Utility maintains a debt service coverage ratio that exceeds the current provisions in the bond indenture document. This debt service coverage ratio is a measure of the adequacy of cash to pay debt service. The Utility must maintain debt coverage of 1.1 as required by the bond indenture, however the City has an internal policy for the Utility to maintain a debt coverage of 2.0. As of June 30, 2022, the Utility had debt coverage of 3.95.

Interest rates on outstanding debt range from 0.39% to 5.25%.

2021 compared to 2020

Total long-term debt, net of unamortized premium of \$4.9 million, was \$158.3 million at the end of FY2021. This represents a decrease of \$7.7 million or 4.6% compared to the prior fiscal year. The current long-term debt due within a year was \$8.7 million and non-current long-term debt was \$149.6 million. The debt is backed by the revenue of the Utility.

The Utility maintains a debt service coverage ratio that exceeds the current provisions in the bond indenture document. This debt service coverage ratio is a measure of the adequacy of cash to pay debt service. The Utility must maintain debt coverage of 1.1 as required by the bond indenture, however the City has an internal policy for the Utility to maintain a debt coverage of 2.0. As of June 30, 2021, the Utility had debt coverage of 2.97.

Interest rates on outstanding debt range from 0.39% to 5.25%.

Long-Term Debt			
(In thousands)			
	FY2022	FY2021	FY2020
Certificates of Participation	\$ 54,005.0	\$ 54,005.0	\$ 54,005.0
Revenue Bonds	94,842.7	104,340.5	112,043.2
Total Long-Term Debt	148,847.7	158,345.5	166,048.2
Current Portion of Long-Term Debt	7,205.0	8,755.0	7,800.0

Economic Condition, Outlook and Activity

The Electric Fund's Residential and commercial customer count increased 2.96% over the prior fiscal year while total retail electric energy sales decrease -0.85%, to 1.1 million megawatt hours. Revenue was up 2.2% correspondingly due to the hydroelectric surcharge and rate case increase.

During the fiscal year, the Electric Fund was rated "AA" by Fitch Ratings and the Ratings Outlook revised to Stable from Positive, Standard and Poor's Global Ratings rating was "AA" and Moody's Investors Service rating was "A1", stable.

The revenue to expense outlook for the next several years forecasts revenues meeting expenses. New development will continue to add residential and commercial customers to the service territory. Issues that may impact future rates include: the increasing volatility of the natural gas and energy markets in California, state and federal mandates related to renewable energy and environmental concerns, as well as increasing distributed generation and energy efficiency programs throughout the service territory.

Requests for Information

This financial report is designed to provide a general overview of the Electric Fund's finances. Questions concerning information provided in this report should be addressed to the Financial Administrator, Roseville Electric Utility, 116 South Grant Street, Roseville, California 95678.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS JUNE 30, 2022 AND 2021

Note 1: Summary of Significant Accounting Policies

a. General

The Electric Fund (Fund) is an enterprise fund of the City of Roseville (City) that owns and operates the electric systems and provides these services to the businesses and residents of the City. The Electric Fund is under the policy control of the City Council. The accompanying financial statements only reflect the activity of the Electric Fund as it does not have any component units. The Electric Fund is an integral part of the City and its financial statements are included in the basic financial statements of the City. These financial statements do not purport to, and do not represent the financial position, changes in financial position, and where applicable, cash flows of the City.

b. Basis of Presentation

The Financial Statements of the Electric Fund are prepared in conformity with accounting principles generally accepted in the United States of America. The Governmental Accounting Standards Board (GASB) is the acknowledged standard setting body for establishing accounting and financial reporting standards followed by governmental entities in the United States of America.

The accounting records of the Electric Fund are also substantially in conformity with the Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission (FERC). The Electric Fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment earnings, result from non-exchange transactions or ancillary activities.

c. Basis of Accounting

The Electric Fund is accounted for as an enterprise fund (proprietary fund type). A fund is an accounting entity with a self-balancing set of accounts established to record the financial position and results of operations of a specific governmental activity. The activities of enterprise funds closely resemble those of the private sector in which the purpose is to conserve and add to economic resources. Enterprise funds account for operations that provide services on a continuous basis and are substantially financed by revenues derived from user charges.

The financial statements are reported using the economic resources measurement focus and the full accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place.

The Electric Fund may fund programs with a combination of cost-reimbursement grants, categorical block grants, and general revenues. Thus, both restricted and unrestricted net position may be available to finance program expenses. The City's policy is to first apply restricted grant resources to such programs, followed by general revenues if necessary.

d. Cash and Investments

Cash and investments with original maturities of three months or less are treated as cash and cash equivalents for purpose of preparing the statements of cash flows. Also, the Electric Fund's portion of the City's overall cash and investment pool is treated as cash and equivalents since these amounts are in substance demand deposits. Further information related to the City's cash and investment pool can be found in the City's Annual Comprehensive Financial Report.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2022 AND 2021

Note 1: Summary of Significant Accounting Policies (Continued)

e. Joint Powers Authorities

The Electric Fund records its equity in the general operating reserve of the Northern California Power Agency (NCPA), and its net equity in those projects in which it participates, as discussed in Note 7. The Electric Fund's share of individual project obligations has been netted against its share of the related project assets, as reported by NCPA, because the Electric Fund does not actively manage these projects and does not expect to become directly liable for any of the obligations of these projects. Amounts paid to the Transmission Agency of Northern California (TANC) are expensed currently because the Electric Fund's estimated equity, if any, in TANC is not material. Amounts paid to the California Joint Powers Risk Management and the Local Agency Workers Compensation Excess Joint Powers Authority are charged currently to insurance expense, as discussed in Note 8.

f. Prepays

Certain payments to vendors reflect costs applicable to future fiscal years and are recorded as prepaid items in the financial statements.

g. Inventories

Certain payments to vendors reflect costs applicable to future fiscal years and are recorded as prepaid items in the financial statements.

h. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position reports a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense) until then. The deferred charge on refunding reported in the statement of net position results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. The accumulated decrease in the fair value of hedging derivatives is equal to the fair value of the associated derivative instrument liability so long as the instrument is deemed effective. The deferred outflows related to pensions are described in Note 5. The deferred outflows related to other postemployment benefits (OPEB) are described in Note 6.

In addition to liabilities, the statement of net position reports a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position or fund balance that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The deferred inflows related to pensions are described in Note 5. The deferred inflows related to OPEB are described in Note 6.

i. Deposits from Customers

Deposits from Customers may be required by the Electric Fund from commercial and residential customers when they establish their account as specified in section 14.04.030 of the City of Roseville Municipal Code. Significant customer deposits may be held in the form of certificates of deposit in the Electric Fund's name with the interest paid to the customer.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2022 AND 2021

Note 1: Summary of Significant Accounting Policies (Continued)

j. Compensated Absences

Compensated Absences including accumulated unpaid vacation, sick pay and other employee benefits are accounted for as expenses in the year earned.

Changes in compensated absences payable consist of the following:

	<u>2022</u>	<u>2021</u>
Beginning Balance	\$ 4,575,222	\$ 4,742,232
Additions	2,198,428	1,268,396
Payments	<u>(2,219,606)</u>	<u>(1,435,406)</u>
Ending Balance	<u>\$ 4,554,044</u>	<u>\$ 4,575,222</u>
Current Portion	<u>\$ 2,973,494</u>	<u>\$ 2,495,110</u>

k. Revenue Recognition

Revenues are recognized based on cycle billings rendered to customers. All residential and commercial utility customers are billed once per month. There are twenty-three billing cycles per month which include all types of customers, based on their location within the City. Revenues for services provided but not billed at the end of a fiscal year are accrued.

Contributions of cash or assets to proprietary funds from state and federal agencies, developers and others are recorded as revenue when earned.

l. Classification of Revenues

Operating revenues consist mainly of electric sales. Operating revenues are used to finance the cost of operations, including the cost of delivering and providing services, maintenance and recurring capital replacement. All other revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

m. Operating Expense

Operating expenses include expenses reflected by the City as related to rent payments, meter reading, billing, customer service, and other indirect cost transfers.

n. Allocation and Capitalization of Operating Overhead Expenses and General and Administrative Costs

The allocation of operating overhead expenses and general and administrative costs to capital projects, as well as FERC distribution and maintenance operating expenses, was based on a comprehensive analysis and study prepared by the City's staff. This analysis and allocation process is conducted annually in conformance with the generally accepted electric utility accounting practices within the Uniform System of Accounts (USOA) prescribed by FERC and utility accounting guides published by the American Public Power Association (APPA) regarding job costing and utility accounting.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2022 AND 2021

Note 1: Summary of Significant Accounting Policies (Continued)

The process of allocating and capitalizing operating overhead expenses and general and administrative costs was implemented to allow the Electric Fund Financial Statements to reflect a chart of accounts consistent with industry standards, provide more accurate operation and maintenance costs, and track the total actual costs of electric capital assets.

o. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

p. Fair Value Measurements

The Electric Fund categorizes the fair value measurements of its investments based on the hierarchy established by GAAP. The fair value hierarchy, which has three levels, is based on the valuation inputs used to measure an asset's fair value: Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

q. Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pension, and pension expense, information about the fiduciary net position of the City's California Public Employees Retirement System (CalPERS) plan and additions to/deductions from the plan's fiduciary net position have been determined on the same basis as they are reported by CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

r. Post-Employment Benefits Other Than Pensions (OPEB)

For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the City's OPEB Plan (Plan) and additions to/deductions from the Plan's fiduciary net position have been determined on the same basis as they are reported by the Plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value, except for money market investments and participating interest-earning investment contracts that have a maturity at the time of purchase of one year or less, which are reported at cost.

s. Capital Asset Policies

All capital assets are valued at historical cost or estimated historical cost if actual historical cost is not available. Contributed capital assets are valued at their estimated acquisition value on the date contributed.

Capital assets with limited useful lives are depreciated over their estimated useful lives. The purpose of depreciation is to spread the cost of capital assets equitably among all users over the life of these assets. The amount charged to depreciation expense each year represents that year's pro rata share of the cost of capital assets.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2022 AND 2021

Note 1: Summary of Significant Accounting Policies (Continued)

Depreciation is provided using the straight-line method which means the cost of the asset is divided by its expected useful life in years and the result is charged to expense each year until the asset is fully depreciated. The Electric Fund has assigned the useful lives and capitalization thresholds listed below to capital assets:

	Useful Lives	Capitalization Thresholds
Buildings	40 years	\$ 20,000
Improvements	20-75 years	no threshold
Equipment	6-20 years	\$ 5,000
Plants and Substations	40 years	\$ 5,000
Distribution System	15-60 years	no threshold
Electric Generation	15-30 years	\$ 5,000
Traffic Signals	20 years	no threshold
Landscaping	12 years	\$ 20,000

Major outlays for capital assets and improvements are capitalized as projects are constructed.

t. New Accounting Pronouncements

New Pronouncements

Effective in Future Fiscal Years

GASB Statement No. 91 – In May 2019, GASB issued Statement No. 91, *Conduit Debt Obligations*. The objectives of this statement are to provide a single method of reporting conduit debt obligations by issuers and eliminate diversity in practice associated with (1) commitments extended by issuers, (2) arrangements associated with conduit debt obligations, and (3) related note disclosures. The requirements of this statement are effective for reporting periods beginning after December 15, 2021. The City has not determined the effect on the Electric Fund's financial statements.

GASB Statement No. 92 – In January 2020, the GASB issued Statement No. 92, *Omnibus 2020*. The objectives of this Statement are to enhance comparability in accounting and financial reporting to improve the consistency of authoritative literature by addressing practices issues that have been identified during implementation and application of certain GASB Statements. The Statement is effective for reporting periods beginning after June 15, 2021. The City has not determined the effect on the Electric Fund's financial statements.

GASB Statement No. 93 – In March 2020, the GASB issued Statement No. 93, *Replacement of Interbank Offered Rates*. The objective of this Statement is to address the accounting and financial reporting implications that result from the replacement of an interbank offered rate (IBOR). The Statement is effective for reporting periods beginning after June 15, 2021. The City has not determined the effect on the Electric Fund's financial statements.

GASB Statement No. 94 – In March 2020, the GASB issued Statement No. 94, *Public-Private and Public-Public Partnerships and Availability Payment Arrangements*. The objective of this Statement is to improve financial reporting by addressing issues related to public-private and public-public partnership arrangements (PPPs). The Statement is effective for reporting periods beginning after June 15, 2022. The City has not determined the effect on the Electric Fund's financial statements.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2022 AND 2021

Note 1: Summary of Significant Accounting Policies (Continued)

GASB Statement No. 96 – In May 2020, the GASB issued Statement No. 96, *Subscription-based Information Technology Arrangements*. The objective of this Statement is to provide guidance on the accounting and financial reporting for subscription-based information technology arrangements (SBITAs) for government end users (governments). The Statement is effective for reporting periods beginning after June 15, 2022. The City has not determined the effect on the Electric Fund's financial statements.

GASB Statement No. 100 – In June 2022, the GASB issued Statement No. 96, *Accounting Changes and Error Corrections*. The objective of this Statement is to enhance accounting and financial reporting requirements for accounting changes and error corrections to provide more understandable, reliable, relevant, consistent, and comparable information for making decisions or assessing accountability. The Statement is effective for reporting periods beginning after June 15, 2023. The City has not determined the effect on the Electric Fund's financial statements.

GASB Statement No. 101 – In June 2022, the GASB issued Statement No. 96, *Compensated Absences*. The objective of this Statement is to better meet the information needs of financial statement users by updating the recognition and measurement guidance for compensated absences. That objective is achieved by aligning the recognition and measurement guidance under a unified model and by amending certain previously required disclosures. The Statement is effective for reporting periods beginning after June 15, 2023. The City has not determined the effect on the Electric Fund's financial statements.

u. Net Position

Net position is the excess of all the Electric Fund's assets and deferred outflows of resources over all its liabilities and deferred inflows of resources. Net position is classified into the captions below:

Net Investment in Capital Assets describes the portion of net position which is represented by the current net book value of the Electric Fund's capital assets less accumulated depreciation and less the outstanding balance of any debt issued to finance these assets.

Restricted describes the portion of net position which is restricted as to use by the terms and conditions of agreements with outside parties, governmental regulations, laws enabling legislation, or other restrictions which the Electric Fund cannot unilaterally alter.

Unrestricted describes the portion of net position which is not restricted to use.

It is the City's policy to apply restricted resources first when an expense is incurred for purposes for which both restricted and unrestricted net position is available.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

Depreciation and amortization on capital assets and intangibles included in the statement of revenues, expenses and changes in net position for the years ended June 30, 2022 and 2021 was \$24,099,767 and \$22,902,800 respectively.

During the fiscal year, the City updated its system to standardize the number of years of depreciation by asset class and updated accumulated depreciation to reflect the standardized years of certain assets.

Note 3: Cash and Investments

The City pools cash from all sources and all funds, except certain specific investments within funds and cash with fiscal agents, so that it can be invested at the maximum yield, consistent with safety and liquidity, while individual funds can make expenditures at any time.

The City and its fiscal agents invest in individual investments and in investment pools. Individual investments are evidenced by specific securities instruments, or by an electronic entry registering the owner in the records of the institution issuing the security, called the book entry system. Individual investments are generally made by the City's fiscal agents as required under its debt issues. In order to maximize security, the City employs the Trust Department of a bank as the custodian of all City managed investments, regardless of their form.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2022 AND 2021

Note 3: Cash and Investments (Continued)

In order to mitigate its credit exposure to energy market risk and protect its financial position, the City requested its trading counterparties to post collateral. The collateral was held by the City in a specific account. If its trading counterparties defaulted on their contract obligations, the City could seize the collateral. Otherwise, the City would ultimately be obligated to return the entire amount back to those companies.

The City's investments of the Electric Fund are carried at fair value, as required by generally accepted accounting principles. The City adjusts the carrying value of its investments to reflect their fair value at each fiscal year end, and it includes the effects of these adjustments in income for that fiscal year. The City's investment pool is not registered with the Security and Exchange Commission and is not rated.

a. Classification

Cash and investments of the Electric Fund are classified in the financial statements as shown below, based on whether or not their use is restricted under the terms of City debt instruments or other agreements.

	2022	2021
Cash and investments in City Treasury	\$ 170,763,511	\$ 170,175,119
Restricted cash and investments with City Treasury	18,800,000	-
Restricted cash and investments with fiscal agent	16,332,511	16,180,219
Total cash and investments	<u>\$ 205,896,022</u>	<u>\$ 186,355,338</u>

Cash and investments with original maturities of three months or less are treated as cash and equivalents for purpose of preparing the statement of cash flows. Also, the Electric Fund's portion of the City's overall cash and investment pool is treated as cash and equivalents since these amounts are in substance demand deposits.

Cash and investments as of June 30, consist of the following:

	2022	2021
Cash on hand	\$ 3,450	\$ 600
City of Roseville pooled cash and investments	189,560,061	170,174,519
Investments	16,332,511	16,180,219
Total cash and investments	<u>\$ 205,896,022</u>	<u>\$ 186,355,338</u>

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 3: Cash and Investments (Continued)

b. Investments Authorized by the California Government Code and the City’s Investment Policy

The City’s Investment Policy and the California Government Code allow the City to invest in the following, provided the credit ratings of the issuers are acceptable to the City; and approved percentages and maturities are not exceeded. The table below also identifies certain provisions of the California Government Code or the City’s Investment Policy where it is more restrictive:

Authorized Investment Type	Maximum Maturity	Minimum Credit Quality	Maximum Percentage Allowed	Maximum Investment in One Issuer
U.S. Treasury Obligations (a)	5 Years	None	None	None
U.S. Agency Securities (a)	5 Years	None	None	None
Forward Delivery Agreements	N/A	A	None	None
Local Agency Bonds	5 Years	None	None	None
Repurchase Agreements	1 Years	None	None	None
Bankers' Acceptances	180 Days	None	40%	30%
Commercial Paper	270 Days	A-1	25%	10% (b)
Medium-Term Notes (Corporate Notes)	5 Years	A	30%	None
Collateralized Time Deposits	5 Years	None	30%	None
Negotiable Certificates of Deposit	5 Years	A	30%	None
Local Agency Investment Fund	N/A	None	None	LAIF Limit
Insured Saving Accounts	N/A	None	None	None
Money Market Mutual Funds	N/A	None	20%	10%
Shares in a California Common Law Trust	N/A	None	None	None
Interest Rate Swaps (c)	N/A	None	None	None
Suprationals	5 Years	AA	30%	None
Mortgage Pass-Through Securities	5 Years	AA	20%	None

(a) In specified fund accounts where liquidity is not the primary investment objective, the maximum maturity can be up to ten years with granted express authority by the City Council. Such investments cannot be made less than three months following the approval of extended investment terms. All longer-term investments must be federal Treasury or Agency securities.

(b) Eligible Commercial Paper may not represent more than 10 percent of the outstanding paper of an issuing corporation.

(c) Interest rate swaps may only be used in conjunction with enterprise fund debt or investments.

c. Investments Authorized by Debt Agreements

The City must maintain required amounts of cash and investments with trustees or fiscal agents under the terms of certain debt issues. These funds are unexpended bond proceeds or are pledged reserves to be used if the City fails to meet its obligations under these debt issues. The California Government Code requires these funds to be invested in accordance with City resolutions, bond indentures, or State statutes.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021

Note 3: Cash and Investments (Continued)

The table below identifies the investment types that are authorized for investments held by fiscal agents. The table also identifies certain provisions of these debt agreements:

Authorized Investment Type	Maximum Maturity	Minimum Credit Quality
U.S. Treasury Obligations (a)	N/A	None
U.S. Agency Securities (a)	N/A	None
Certificates of Deposit	N/A - 30 days	None to A-1
Bankers' Acceptances	N/A - 270 days	None to A-1
Money Market Mutual Funds	N/A	None to Aam-G
Pre-refunded Municipal Obligations	N/A	AAA
Repurchase Agreements	N/A - 30 days	None to A
Investments Agreements	N/A	A+ to AA
California Asset Management Program (CAMP)	N/A	None
Local Agency Investment Fund (LAIF)	N/A	None
Guaranteed Investment Contract	N/A	None

d. Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Normally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. The City also manages its interest rate risk by holding most investments to maturity.

Information about the sensitivity of the fair values of the investments to market interest rate fluctuations is provided by the following table that shows the distribution of the investments by maturity or earliest call date, as of June 30, 2022:

June 30, 2022	Remaining Maturity (in Months)		Total
	12 Months or Less	More than 60 Months	
City of Roseville Investment Pool	\$ 189,560,061	\$ -	\$ 189,560,061
Money Market Mutual Funds	14,181,774	-	14,181,774
Guaranteed Investment Contract (GIC)	-	2,150,737	2,150,737
Total investments	\$ 203,741,835	\$ 2,150,737	\$ 205,892,572

Information about the sensitivity of the fair values of the investments to market interest rate fluctuations is provided by the following table that shows the distribution of the investments by maturity or earliest call date, as of June 30, 2021:

June 30, 2021	Remaining Maturity (in Months)		Total
	12 Months or Less	More than 60 Months	
City of Roseville Investment Pool	\$ 170,174,519	\$ -	\$ 170,174,519
Money Market Mutual Funds	14,029,483	-	14,029,483
Guaranteed Investment Contract (GIC)	-	2,150,736	2,150,736
Total investments	\$ 184,204,002	\$ 2,150,736	\$ 186,354,738

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 3: Cash and Investments (Continued)

e. Credit Risk

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Presented below is the actual rating as of June 30, 2022 and 2021 for each investment type as provided by Standard and Poor's investment rating system:

<u>June 30, 2022</u>	<u>Total</u>
Not Rated	
City of Roseville Investment Pool	\$ 189,560,061
Money Market Mutual Funds	14,181,774
Guaranteed Investment Contract (GIC)	<u>2,150,737</u>
Subtotal	<u>205,892,572</u>
Total Investments	<u>\$ 205,892,572</u>
<u>June 30, 2021</u>	<u>Total</u>
Not Rated	
City of Roseville Investment Pool	\$ 170,174,519
Money Market Mutual Funds	14,029,483
Guaranteed Investment Contract (GIC)	<u>2,150,736</u>
Subtotal	<u>186,354,738</u>
Total Investments	<u>\$ 186,354,738</u>

f. Fair Value Measurements

The Electric Fund categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is used on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quotes prices in active markets for identical assets; Level 2 inputs are significant other observable input; Level 3 inputs are significant unobservable inputs.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The City's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability.

JUNE 30, 2022 AND 2021**

Note 3: Cash and Investments (Continued)

The Electric Fund has the following recurring fair value measurements as of June 30, 2022 and 2021:

	Balance at June 30, 2022	Significant Other Observable Inputs (Level 2)
<u>Investment at Fair Value</u>		
Money Market Mutual Funds	\$ 14,181,774	<u>\$ 14,181,774</u>
<u>Investments not subject to the Fair Value Hierarchy</u>		
City of Roseville Investment Pool	189,560,061	
<u>Investments Measured at Amortized Cost</u>		
Guaranteed Investment Contract (GIC)	<u>2,150,737</u>	
Total Investments	<u>\$ 205,892,572</u>	
	Balance at June 30, 2021	Significant Other Observable Inputs (Level 2)
<u>Investment at Fair Value</u>		
Money Market Mutual Funds	\$ 14,029,483	<u>\$ 12,833,586</u>
<u>Investments not subject to the Fair Value Hierarchy</u>		
City of Roseville Investment Pool	170,174,519	
<u>Investments Measured at Amortized Cost</u>		
Guaranteed Investment Contract (GIC)	<u>2,150,736</u>	
Total Investments	<u>\$ 186,354,738</u>	

Note 4: Leases

For the year ended June 30, 2022, the financial statements include the adoption of GASB Statement No. 87, Leases. The primary objective of this statement is to enhance the relevance and consistency of information about governments' leasing activities. This statement establishes a single model for lease accounting based on the principle that leases are financings of the right to use an underlying asset. Under this Statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources. Under the guidance provided in GASB Statement No. 87, Leases, all leases are valued at July 1, 2021 and will not be shown comparatively. For additional information, refer to the disclosures below.

b. Direct Placement

2012 Electric System Revenue Refunding Certificates of Participation

On November 7, 2012 the City entered into a direct placement agreement with U.S. Bank for the purchase of the 2012 bonds. The COP's were issued to refund and retire the outstanding balance of the 2008A Electric System Revenue COPs. As of June 30, 2022, the City's outstanding debt from direct borrowing of \$54,000,000 are subject to special redemption prior to their respective stated date of maturity by the City upon written notice. There is no provision for early redemption by U.S. Bank (Purchaser).

The COPs are secured by a pledge of the net revenue of the Electric Department. The revenue may not be used for any other purpose while any of the bonds remain outstanding.

The continuing covenant agreement for the bonds includes a provision that in an event of default, the repayment of the outstanding principal plus any accrued interest becomes immediately due. The City is responsible for cost increases caused by the adoption of a law or rule applicable to the bonds, changes in the taxes or tax basis of the Purchaser or Credit Protection Provider.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2022 AND 2021

Note 5: Long-Term Debt (Continued)

The terms of this agreement were renewed on April 20, 2016, and will expire on November 1, 2019. The City originally entered into a 27-year interest rate swap agreement for the entire amount of the 2008A COPs, and the interest rate swap agreement remains outstanding after the refunding, but notional amount of the swap is based on the notional amount of the 2008A COPs. The combination of the variable rate COPs and a floating rate swap creates synthetic fixed-rate debt for the City. The synthetic fixed rate for the COPs was 3.919 percent for the year ended June 30, 2022. The COPs are subject to mandatory prepayment annually beginning February 1, 2023 through 2035. The balance outstanding as of June 30, 2022 is \$54,000,000.

On November 1, 2019, the 2012 Electric COPs were paid down by \$36,000,000 leaving a balance of \$54,000,000. In addition, the Bank of America Merrill Lynch swap was terminated as of this date. As a result, the City paid \$7,176,500 to terminate the interest rate swap agreement. The US Bank direct placement was renewed with new interest rate terms of 80% of one-month LIBOR plus 60 basis points with direct placement expiring May 1, 2023.

c. Certificates of Participation

2004 Electric System Revenue Certificates of Participation

On July 1, 2004, the City issued \$39,940,000 of Certificates of Participation (COPs) to finance capital improvements to the City's Electric System. The COPs are repayable from net revenue of the Electric Utility System. The COPs bear interest at 3.00 percent to 5.25 percent and are due semi-annually on February 1 and August 1 of each year beginning February 1, 2005. Principal payments are due annually on February 1 through February 2034. The COPs were partially refunded by the 2013 Electric System Revenue Refunding Bonds as discussed in Note 4D below. In August 2014, the 2004 Electric System Revenue COP was partially refunded by the 2014 Electric System Revenue Refunding Bonds as discussed in Note 4g below, leaving partially a par amount of \$5,000.

d. Revenue Bonds

2013 Electric System Revenue Refunding Bonds

On November 14, 2013, the Roseville Finance Authority issued the Electric System Revenue Refunding Bonds, Series 2013, in the principal amount of \$48,780,000 to refund a portion of each of the 2004 Electric System Revenue and 2005 Electric System Revenue, Series A, COPs. The Bonds bear interest at 2.00 percent to 5.00 percent, and are due semi-annually on February 1 and August 1 of each year. The Bonds are repayable by a pledge of net revenue from the Electric System. Principal payments are due annually on February 1 through 2029. In September 2020, the City issued the 2020 Taxable Electric System Revenue Refunding Bonds, which refunded a portion of the 2013 bonds, which are further described below. The balance outstanding as of June 30, 2022 is \$875,000.

2017A Electric System Revenue Refunding Bonds

On February 8, 2017, the City issued Revenue Bonds in the original principal amount of \$56,210,000. The Bonds were issued to refund a portion of the 2009 Electric System Revenue Refunding Certificates of Participation and the 2010 Electric System Revenue Refunding Bonds. The Revenue Bonds bear interest at 3.00 percent to 5.00 percent and are due semi-annually on February 1 and August 1 of each year. Principal payments are due annually on February 1 starting in 2022 and running through 2037. The balance outstanding as of June 30, 2022 is \$56,035,000.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 5: Long-Term Debt (Continued)

2017B Taxable Electric System Revenue Refunding Bonds

On February 8, 2017, the City issued Taxable Revenue Bonds in the original principal amount of \$6,265,000. The Bonds were issued to refund a portion of the 2009 Electric System Revenue Refunding Certificates of Participation and the 2010 Electric System Revenue Refunding Bonds. The Revenue Bonds bear interest at 1.03 percent to 2.41 percent and are due semi-annually on February 1 and August 1 of each year. Principal payments are due annually on February 1 through 2022. The balance outstanding was paid in full as of June 30, 2022.

2020 Electric System Revenue Refunding Bonds

On September 2020, the City issued Taxable Revenue Bonds in the original principal amount of \$34,770,000. The Bonds were issued to refund a portion of the 2013 and 2014 Electric System Revenue Refunding Bonds. The Revenue Bonds bear interest at 0.389 percent to 2.081 percent and are due semi-annually on February 1 and August 1 of each year. Principal payments are due annually on February 1 through 2034. The balance outstanding as of June 30, 2022 is \$33,810,000

e. Electric System Pledged Revenues

As of June 30, 2022, the total principal and interest remaining to be paid on the 2004 Electric System Revenue COPs, the 2013 Electric System Revenue Refunding Bonds, the 2017A Electric System Revenue Refunding bonds and the 2020 Electric System Revenue Refunding Bonds was \$181,542,353. As disclosed in the official statements, all net revenues of the Electric System are expected to provide coverage over debt service of 110 percent over the lives of the Bonds. For fiscal year 2022, net revenues amounted to \$55,418,071 which represents coverage of 395 percent over the \$14,042,744 in debt service.

f. Interest Rate Swap Agreements

The City entered into interest swap agreements in connection with the 2008 Electric Revenue Certificates of Participation (COPs), Series A.

This transaction allows the City to create synthetic fixed rates on the COPs, protecting it against increases in short-term interest rates. The terms, fair value and credit risk of the swap agreements are disclosed below.

Terms: The terms, including the counterparty credit ratings of the outstanding swaps, as of June 30, 2022, are included below. The swap agreements contain scheduled reductions to the outstanding notional amount that are expected to follow scheduled reductions in the associated bond issue.

Related Bond Issue	Notional Amount	Effective Date	Counterparty	Credit Rating ^(A)	Fixed Rate Paid	Variable Rate Received	Termination Date
2012 Electric System Refunding COP	\$ 54,000,000	5/13/2008	Morgan Stanley Capital Services, Inc.	A+	3.321%	80% 1m LIBOR plus 60 basis point	2/1/2035
	<u>\$ 54,000,000</u>						

^(A) Credit rating by Standard & Poor's Agency.

Based on the swap agreements, the city owes interest calculated at a fixed rate to the counterparty of the swap. In return, the counterparty owes the City interest based on the variable rate that approximates the rate required by the associated COPs. Debt principal is not exchanged; it is only the basis on which the swap receipts and payments are calculated.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 5: Long-Term Debt (Continued)

Fair value – Fair value of the swaps takes into consideration the prevailing interest rate environment, the specific terms and conditions of each transaction and any upfront payments that may have been received. Hedging derivative instruments are classified as Level 2 and are valued using a discounted cash flow technique, which calculates the future net settlement payments, assuming that current forward rates implied by the yield curve correctly anticipate future spot interest rates (LIBOR or SIMFA). The payments are then discounted using the spot rates (LIBOR or SIMFA) implied by the current yield curve for hypothetical zero coupon bonds due on the date of each future net settlement on the swap.

As of June 30, 2022, the fair value of the swaps was not in favor of the Electric Fund as follows:

Related Bond Issue	Fair Value	
	2022	2021
2012 Electric System Refunding COP		
Morgan Stanley Capital Services, Inc.	\$ (4,190,270)	\$ (10,219,188)
	<u>\$ (4,190,270)</u>	<u>\$ (10,219,188)</u>

Credit risk – Since the fair values of the swaps are negative, the City is not currently exposed to credit risk. The fair values may increase if interest rates increase in the future. Should interest rates increase to the point where the fair values become positive, the City would be exposed to credit risk on the outstanding swaps. The City will be exposed to interest rate risk only if a counterparty to a swap defaults or if the swap is terminated.

Basis risk – Basis risk is the risk that the interest rate paid by the City on the underlying variable rate bonds to the bondholders temporarily differs from the variable swap rates received from the applicable counterparty. The City bears basis risk on the swaps. The swaps have basis risk since the City receives a percentage of the LIBOR Index to offset the actual variable bond rates the City pays on the underlying COPs and Bonds. The City is exposed to basis risk should the floating rate that it receives on a swap be less than the actual variable rate the City pays on the bonds. Depending on the magnitude and duration of any basis risk shortfall, the expected cost of the basis risk may vary.

Termination risk – The City may terminate if the other party fails to perform under the terms of the contract. The City will be exposed to variable rates if the counterparty to the swap contract defaults or if the swap contract is terminated. A termination of the swap contract may also result in the City's making or receiving a termination payment based on market interest rates at the time of the termination. If at the time of termination, the swap has a negative fair value, the City would be liable to the counterparty for a payment equal to the swap's fair value.

Rollover Risk – Rollover risk is the risk that the swap associated with a debt issue matures or may be terminated prior to the maturity of the associated debt. When the swap terminates or a termination option is exercised by the counterparty, the City will be re-exposed to the risks being hedged by the swap. The would be exposed to rollover risk if the swap terminates before the maturity date.

Swap payments and associated debt – Using rates as of June 30, 2021, debt service requirements of the Electric Fund's outstanding variable-rate debt and net swap payments are as follows. As rates vary, variable-rate bond interest payments and net swap payments will vary. These payments below are included in the Debt Service Requirements at Note 4h:

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 5: Long-Term Debt (Continued)

For the Year Ending June 30,	Principal	Interest	Interest Rate Swaps, Net	Total
2023	\$ 2,925,000	\$ 930,580	\$ 822,286	\$ 4,677,866
2024	3,420,000	875,373	773,504	5,068,877
2025	3,555,000	814,084	719,346	5,088,430
2026	3,690,000	750,414	663,086	5,103,500
2027	3,840,000	684,254	604,626	5,128,880
2028-2032	21,525,000	2,335,761	2,063,941	25,924,702
2033-2037	15,045,000	426,601	376,956	15,848,557
Total	<u>\$ 54,000,000</u>	<u>\$ 6,817,067</u>	<u>\$ 6,023,745</u>	<u>\$ 66,840,812</u>

g. Original Issue Discounts and Premiums, Deferred Amounts on Refunding

For proprietary fund types, bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Any difference between proprietary refunded debt and the debt issued to refund it is amortized over the remaining life of either the refunded debt or the refunding debt, whichever is shorter.

h. Debt Service Requirements

Annual debt service requirements are shown for all long-term debt:

For the Year Ending June 30,	Principal	Interest	Direct Placement	
			Principal	Interest
2023	\$ 4,280,000	\$ 2,939,934	\$ 2,925,000	\$ 930,580
2024	4,250,000	2,771,536	3,420,000	875,373
2025	4,320,000	2,586,017	3,555,000	814,084
2026	4,400,000	2,499,576	3,690,000	750,414
2027	4,450,000	2,403,441	3,840,000	684,254
2028-2032	23,105,000	10,299,545	21,525,000	2,335,761
2033-2037	45,920,000	6,500,237	15,045,000	426,601
Total	<u>\$ 90,725,000</u>	<u>\$ 30,000,286</u>	<u>\$ 54,000,000</u>	<u>\$ 6,817,067</u>

Note 6: Pension Plan

a. Plan Description

Substantially all Electric Fund employees are eligible to participate in the City's Miscellaneous Plan, an agent multiple-employer defined benefit pension plan administered by the California Public Employees Retirement System (CalPERS), which acts as a common investment and administrative agent for its participating member employers. Benefit provisions under the Plan are established by State statute and may be amended by City resolution. CalPERS issues publicly available reports that include a full description of the pension plans regarding benefit provisions, assumptions and membership information that can be found on the CalPERS website.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 6: Pension Plan (Continued)

b. Benefits Provided

CalPERS provides retirement and disability benefits, annual cost of living adjustments and death benefits to plan members, who must be public employees and beneficiaries. Benefits are based on years of credited service, equal to one year of full time employment. Members with five years of total service are eligible to retire at age 50 with statutorily reduced benefits. All members are eligible for non-duty disability benefits after 10 years of service. The death benefit is one of the following: the Basic Death benefit, the 1957 Survivor Benefit, or the Optional Settlement 2W Death Benefit. The cost of living adjustments for each plan are applied as specified by the Public Employees' Retirement Law.

The Plan's provisions and benefits in effect at June 30, 2022 and 2021, are summarized as follows:

	Miscellaneous	
	Prior to January 1, 2013	After to January 1, 2013
Hire date	5 years service	5 years service
Benefit vesting schedule	monthly for life	monthly for life
Benefit payments	50-55	52-67
Retirement age	2.0-2.7%	1.0-2.5%
Monthly benefits, as a % of annual salary	8.000%	6.250%
Required employee contribution rates	10.847%	12.500%
Required employer contribution rates*		

*There was an additional contribution amount related to the payment of the Unfunded Actuarial Liability (UAL). This amount is allocated by the City to the City's various funds.

c. Contributions

Section 20814(c) of the California Public Employees' Retirement law requires that the employer contribution rates for all public employers are determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in rate. Funding contributions for the Plan is determined annually on an actuarial basis as of June 30 by CalPERS. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The Electric Fund is required to contribute the difference between the actuarially determined rate and the contribution rates of employees.

The Electric Fund's proportionate share of the City's contributions to the Miscellaneous Plan was \$7,457,891 and \$7,058,610 for the year ended June 30, 2022 and 2021, respectively.

d. Pension Liability, Pension Expense and Deferred Outflows/Inflows of Resources Related to Pensions

As of June 30, 2022 and 2021, the Electric Fund reported a net pension liability of \$47,478,679 and \$68,619,020 respectively for its proportionate share of the City's Miscellaneous Plan's net pension liability.

The net pension liability of the Plan was measured as of June 30, 2021, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2020. The Electric Fund's proportion of the City's Miscellaneous Pension Plan's net pension liability was based on the Electric Fund's fiscal year 2021 contributions to the City's miscellaneous pension plan relative to the total contributions of the City as a whole. The Electric Fund's proportionate share of the City's miscellaneous pension plan net pension liability, measured as of June 30, 2020 and June 30, 2021, for June 30, 2021 and 2022 was 24.58 percent and 25.60 percent respectively.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021

Note 6: Pension Plan (Continued)

For the year ended June 30, 2022 and 2021, the Electric Fund recognized pension expense of \$809,249 and \$13,957,814 respectively. At June 30, 2022 and 2021, the Electric Fund reported deferred outflows of resources and deferred inflows of resources related to pension from the following sources:

	2022	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Employer contributions subsequent to measurement date	\$ 7,457,891	\$ -
Differences between expected and actual experience	2,105,619	-
Changes in assumptions	-	34,790
Net differences between projected and actual earnings on pension plan investments	-	13,642,401
Total	\$ 9,563,510	\$ 13,677,191

	2021	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Employer contributions subsequent to measurement date	\$ 7,058,610	\$ -
Differences between expected and actual experience	2,811,155	-
Changes in assumptions	-	396,847
Net differences between projected and actual earnings on pension plan investments	905,100	-
Total	\$ 10,774,865	\$ 396,847

The amount of \$7,457,891 reported at June 30, 2022 in the enterprise fund as deferred outflows of resources related to pensions, resulting from the Electric Fund's contributions to the City's plan subsequent to the measurement date, will be recognized as a reduction of the net pension liability in the year ended June 30, 2023. Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized as a reduction to pension expense as follows:

For the Year Ending June 30,	Net Deferred Outflows/(Inflows) of Resources
2023	\$ (2,393,803)
2024	(2,689,994)
2025	(3,175,244)
2026	(3,438,697)
Total	\$ (11,697,738)

e. Actuarial Assumptions

The Electric Fund's proportion of the City's Miscellaneous Plan total pension liability in the June 30, 2020 and 2019, actuarial valuation was determined using the following actuarial assumptions.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 6: Pension Plan (Continued)

	Miscellaneous	
Valuation Date	June 30, 2020	June 30, 2019
Measurement Date	June 30, 2021	June 30, 2020
Actuarial Cost Method	Entry-Age Normal Cost Method	
Actuarial Assumptions:		
Discount Rate	7.15%	7.15%
Inflation	2.15%	2.75%
Payroll Growth	2.75%	3.00%
Projected Salary Increase	3.3-14.2% (1)	3.3-14.2% (1)
Investment Rate of Return	7.00% (2)	7.15% (2)
Mortality	Derived using CalPERS membership data	

(1) Depending on age, service and type of employment

(2) Net of pension plan investment and administrative expenses, includes inflation

The underlying mortality assumptions and all other actuarial assumptions used in the June 30, 2020 valuation were based on the results of an actuarial experience study for the period of 1997 to 2015. Further details of the Experience Study can be found on the CalPERS website.

The long-term expected rate of return on pension plan investments was determined using a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return on pension plan investments, CalPERS took into account both short and long-term market return expectations as well as the expected pension fund cash flows. Such cash flows were developed assuming that both members and employers will make their required contributions on time and as scheduled in all future years. Using historical returns of all the funds' asset classes, expected compound (geometric) returns were calculated over the short-term (first 10 years) and the long-term (11+ years) using a building-block approach. Using the expected nominal returns for both short-term and long-term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equivalent to the single equivalent rate calculated above and rounded down to the nearest one quarter of one percent.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021

Note 6: Pension Plan (Continued)

The table below reflects long-term expected real rate of return by asset class. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation. These geometric rates of return are net of administrative expenses.

Asset Class ⁽¹⁾	2022		
	Assumed Asset Allocation	Real Return Years 1-10 ⁽²⁾	Real Return Years 11+ ⁽³⁾
Global Equity	50%	4.80%	5.98%
Fixed Income	28%	1.00%	2.62%
Inflation Assets	0%	0.77%	1.81%
Private Equity	8%	6.30%	7.23%
Real Assets	13%	3.75%	4.93%
Liquidity	1%	0.00%	-0.92%
Total	100%		

(1) - In the Basic Financial Statement, Fixed Income is included in Global Debt Securities; Liquidity is included in Short-Term Investment; Inflation Assets are included in both Global Equity Securities and Global Debt Securities.

(2) - An expected inflation of 2.0% used for this period

(3) - An expected inflation of 2.92% used for this period

Asset Class ⁽¹⁾	2021		
	Assumed Asset Allocation	Real Return Years 1-10 ⁽²⁾	Real Return Years 11+ ⁽³⁾
Global Equity	50%	4.80%	5.98%
Fixed Income	28%	1.00%	2.62%
Inflation Assets	0%	0.77%	1.81%
Private Equity	8%	6.30%	7.23%
Real Assets	13%	3.75%	4.93%
Liquidity	1%	0.00%	-0.92%
Total	100%		

(1) - In the Basic Financial Statement, Fixed Income is included in Global Debt Securities; Liquidity is included in Short-Term Investment; Inflation Assets are included in both Global Equity Securities and Global Debt Securities.

(2) - An expected inflation of 2.0% used for this period

(3) - An expected inflation of 2.92% used for this period

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 6: Pension Plan (Continued)

f. Discount Rate

The discount rate used to measure the total pension liability was 7.15 percent and 7.15 percent for the Plan as of the measurement date of June 30, 2022 and 2021, respectively. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that the City’s contributions will be made at rates equal to the difference between actuarially determined contributions rates and the employee rate. Based on those assumptions, each pension plan’s fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

g. Sensitivity of the Electric Fund’s proportionate share of the City’s Miscellaneous Plan Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the Electric Fund for the Plan, calculated using the discount rate for the Plan, as well as what the Electric Fund’s net pension liability would be if it were calculated using a discount rate that is 1-percentage point lower or 1-percentage point higher than the current rate:

	<u>2022</u>	<u>2021</u>
1% Decrease	6.15%	6.15%
Net Pension Liability	\$ 73,354,982	\$ 94,841,628
Current Discount Rate	7.15%	7.15%
Net Pension Liability	\$ 47,478,679	\$ 68,619,020
1% Increase	8.15%	8.15%
Net Pension Liability	\$ 26,052,903	\$ 46,951,276

h. Pension Plan Fiduciary Net Position

Detailed information the City’s collective net pension liability is available in the City’s separately issued Annual Comprehensive Financial Report. The City’s financial statements may be obtained by contacting the City of Roseville’s Finance Department. That report may be obtained on the internet at www.roseville.ca.us.

Note 7: Post-Employment Benefits

Plan Description - The City provides medical benefits to substantially all retirees under the City of Roseville Retiree Healthcare Plan, a sole employer defined benefit healthcare plan administered by the Trust Investment Review Committee. The City is responsible for establishing and amending the funding policy of the Plan. The plan financial statements can be obtained by contacting the City of Roseville Finance Department at 311 Vernon Street, Roseville, California 95678. For financial reporting purposes, the Electric Fund reports a proportionate share of the City’s net OPEB liability. Accordingly, the disclosures and required supplementary information (RSI) have been reported for the Electric Fund as a cost-sharing participant.

Benefits Provided – The Plan provides medical, dental, and vision insurance benefits to eligible retirees and their dependents. Benefits are provided through a third-party insurer, and the full cost of the benefits is covered by the Plan. Benefit provisions are established and may be amended by City labor agreements, which are approved by the City Council.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021

Note 7: Post-Employment Benefits (Continued)

Contributions – Contribution requirements of the Electric Fund are established and may be amended by the City Council. The Council established rates based on an actuarially determined rate. For the year ended June 30, 2022 and 2021, the Electric Fund contributed \$1,708,099 and \$2,061,654 respectively.

OPEB Liability, OPEB Expense and Deferred Outflows/Inflows of Resources Related to OPEB.

As of June 30, 2022 and 2021, the Electric Fund reported a net OPEB liability of \$10,427,000 and \$11,681,000 respectively for its proportionate share of the City's net OPEB liability.

The net OPEB liability of the Plan was measured as of June 30, 2022, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of June 30, 2021. The Electric Fund's proportion of the Plan's net OPEB liability was based on the Electric Fund's fiscal year 2022 contributions to the Plan relative to the total contributions of the City as a whole. The Electric Fund's proportionate share of the Plan's net OPEB liability, measured as of June 30, 2022 and 2021, was 12.45 percent 11.72 percent respectively.

For the year ended June 30, 2022 and 2021, the Electric Fund recognized OPEB expense of \$1,085,099 and \$2,856,654 respectively. At June 30, 2022 and 2021, the Electric Fund reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	2022	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Changes in assumptions	\$ 1,076,880	\$ 2,335,804
Differences between expected and actual experience	-	4,679,196
Net difference between projected and actual earnings on plan investments	1,092,120	-
Total	\$ 2,169,000	\$ 7,015,000

	2021	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Changes in assumptions	\$ 1,325,000	\$ 482,938
Differences between expected and actual experience	-	3,001,155
Net difference between projected and actual earnings on plan investments	-	2,055,907
Total	\$ 1,325,000	\$ 5,540,000

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021

Note 7: Post-Employment Benefits (Continued)

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized as a reduction to pension expense for the year ending June 30, 2022 are as follows:

<u>For the Year Ending June 30,</u>	<u>Deferred Outflows (Inflows)</u> <u>of Resources</u>
2023	\$ (1,120,379)
2024	(1,008,827)
2025	(754,350)
2026	(220,059)
2027	(739,058)
Therafter	(1,003,327)
Total	<u>\$ (4,846,000)</u>

The Electric Fund's proportion of the City's total OPEB liability in the June 30, 2021 and 2019 actuarial valuations was determined using the following actuarial assumptions:

	<u>Miscellaneous</u>	
Valuation Date	June 30, 2021	June 30, 2019
Measurement Date	June 30, 2022	June 30, 2021
Actuarial Cost Method	Entry-Age Normal Cost Method; Level % of pay	
Actuarial Assumptions:		
Discount Rate	5.75%	6.00%
Inflation	2.50%	2.75%
Payroll Growth	2.75%	3.00%
Projected Salary Increase	2.75%	3.00%
Investment Rate of Return	5.75%	6.00%
Healthcare cost trend rate	Non-medicare: 6.5% for 2023, decreasing to an ultimate rate of 3.75% in 2076. Medicare: 6.5% for 2020, decreasing to an ultimate rate of 4.0% in 2076.	
Mortality	CalPERS 1997-2015 Experience Study 11 Experience Study.	

The underlying mortality assumptions and all other actuarial assumptions used in the June 30, 2021, valuation were based on the results of an actuarial experience study for the period of 1997 to 2011. Further details of the Experience Study can be found on the CalPERS website.

In measurement year ended June 30, 2022 and 2021, the discount rate was 5.75 percent and 6.00 percent respectively.

The table below reflects long-term expected real rate of return by asset class for the year ended June 30, 2022. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation. These geometric rates of return are net of administrative expenses.

<u>Asset Class</u>	<u>2022</u>	
	<u>Target</u>	<u>Expected Real Return</u>
Equities	60%	4.65%
Fixed Income	40%	0.78%
Total	<u>100%</u>	

Assumed Long-Term Rate of Inflation is 2.50%

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 7: Post-Employment Benefits (Continued)

The table below reflects long-term expected real rate of return by asset class for the year ended June 30, 2021. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation. These geometric rates of return are net of administrative expenses.

Asset Class	2021	
	Target	Expected Real Return
Equities	60%	4.65%
Fixed Income	40%	0.78%
Total	100%	

Assumed Long-Term Rate of Inflation is 2.75%

Discount Rate

The discount rate used to measure the total pension liability was 6.00 percent. The projection of cash flows used to determine the discount rate assumed that contributions will be made at rates equal to the actuarially determined rate. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

Sensitivity of the Electric Fund's proportionate share of the Plan's net OPEB Liability to changes in the discount rate

The following presents the Electric Fund's proportionate share of the net OPEB liability, calculated using the discount rate for the Plan, as well as what the Electric Fund's proportionate share of the net OPEB liability would be if it were calculated using a discount rate that is 1-percentage point lower or 1-percentage point higher than the current rate:

	2022		
	1% decrease 4.75%	Current 5.75%	1% increase 6.75%
Electric Fund's net OPEB liability	\$ 14,195,270	\$ 10,427,000	\$ 7,369,706

	2021		
	1% decrease 5.00%	Current 6.00%	1% increase 7.00%
Electric Fund's net OPEB liability	\$ 15,839,666	\$ 11,681,000	\$ 8,312,113

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Note 7: Post-Employment Benefits (Continued)

Sensitivity of the Electric Fund’s proportionate share of the Plan’s net OPEB Liability to changes in the healthcare cost trend rate

The following presents the Electric Fund’s proportionate share of the net OPEB liability, as well as what the Electric Fund’s proportionate share of the net OPEB liability would be if it were calculated using a healthcare cost trend rates that are 1-percentage point lower or 1-percentage point higher than the current healthcare cost trend rate:

	2022		
	1% decrease (5.5% decreasing to 2.75%)	Current (6.5% decreasing to 3.75%)	1% increase (7.5% increasing to 4.75%)
Electric Fund's net OPEB liability	\$ 7,616,687	\$ 10,427,000	\$ 13,481,417

	2021		
	1% decrease (6.5% decreasing to 3%)	Current (7.5% decreasing to 4%)	1% increase (8.5% increasing to 5%)
Electric Fund's net OPEB liability	\$ 8,532,058	\$ 11,681,000	\$ 14,791,695

OPEB Plan Fiduciary Net Position – Detailed information about the City’s collective net OPEB liability is available in the City’s separately issued Annual Comprehensive Financial Report. The City’s Annual Comprehensive Financial Report may be obtained at www.roseville.ca.us.

Note 8: Northern California Power Agency (NCPA)

a. General

The City participates in joint ventures through Joint Powers Authorities (JPAs) established under the Joint Exercise of Powers Act of the State of California. As separate legal entities, these JPAs exercise full powers and authorities within the scope of the related Joint Powers Agreement, including the preparation of annual budgets, accountability for all funds, the power to make and execute contracts and the right to sue and be sued. Obligations and liabilities of the JPAs are not those of the City.

Each JPA is governed by a board consisting of representatives from each member agency. Each board controls the operations of its respective JPA, including selection of management and approval of operating budgets, independent of any influence by member agencies beyond their representation on the Board.

The City is a member of NCPA, a joint powers agency which operates under a joint powers agreement among fifteen public agencies. The purpose of NCPA is to use the combined strength of its members to purchase, generate, sell and interchange electric energy and capacity through the acquisition and use of electrical generation and transmission facilities, and to optimize the use of those facilities and the member’s position in the industry. Each agency member has agreed to fund a pro rata share of certain assessments by NCPA and certain members have entered into take-or-pay power supply contracts with NCPA. While NCPA is governed by its members, none of its obligations are those of its members unless expressly assumed by them.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 8: Northern California Power Agency (NCPA) (Continued)

The City receives no income from NCPA, and does not participate in all of its projects. Further, NCPA does not measure or determine the City's equity in NCPA as a whole. NCPA reports only the City's share of its General Operating Reserve, comprised of cash and investments, and the City's share of those Projects in which the City is a participant. These amounts are reflected in the financial statements as Investment in NCPA Reserve.

During the year ended June 30, 2022 and 2021, the City incurred expenses totaling \$3,338,354 and \$5,352,544 respectively for purchased power, regulatory and legislative assessments, association dues and prepaid assets paid to NCPA.

The City's interest in certain NCPA Projects and Reserve, as computed by NCPA using unaudited information, is set forth below.

	<u>June 30, 2022</u>	<u>June 30, 2021</u>
General Operation Reserve (including advances)	\$ 4,017,291	\$ 3,974,683
Associated Member Services (including advances)	83,731	85,739
Undivided equity interest, at cost, in certain NCPA Power Projects:		
Geothermal Projects	1,254,280	509,432
Calaveras Hydroelectric Project	375,254	419,706
Combustion Turbine Project No. 2	306,572	169,068
	<u>\$ 6,037,128</u>	<u>\$ 5,158,628</u>

The General Operating Reserve (GOR) is an additional operating reserve for non-budgeted items that are contingent or non-specific. Deposits to the GOR include items such as the City's portion of funds which resulted from the settlement with third parties of issues with financial consequences and reconciliations of prior years' budgets for programs. It is recognized that all the funds credited to the City are linked to the collection of revenue from the City's ratepayers, or to the settlement of disputes relating to electric power supply and that the money was collected from the City's ratepayers to pay power bills. Additionally, the NCPA Commission identified and approved the funding of specific reserves for working capital, accumulated employees post - retirement medical benefits, and billed property taxes for the geothermal project. The Commission also identified a number of contingent liabilities that may or may not be realized, the cost of which in most cases is difficult to estimate at this time. One such contingent liability is the steam field depletion which will require funding to cover debt service and operational costs in excess of the expected value of the electric power. The General Operating Reserve is intended to minimize the number and amount of individual reserves needed for each project, protect NCPA's financial condition and maintain its credit worthiness. These funds are available on demand, but the City maintains funds with NCPA as a reserve against these contingencies identified by NCPA.

Members of NCPA may participate in an individual project of NCPA without obligation for any other project. Member assessments collected for one project may not be used to finance other projects of NCPA without the member's permission.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2022 AND 2021

Note 8: Northern California Power Agency (NCPA) (Continued)

b. Projects

Geothermal Projects

NCPA's Geothermal Project has experienced a greater than originally anticipated decline in steam production from geothermal wells on its leasehold property. NCPA will continue to monitor the wells while pursuing alternatives for improving and extending reservoir performance, including supplemental water reinjection, plant equipment modifications, and changes in operating methodology. NCPA, along with other steam field operators, has observed a substantial increase in steam production in the vicinity of reinjection wells and is attempting to increase water reinjection at strategic locations. NCPA, together with other steam developers and the Lake County Sanitation District, has completed the construction of a wastewater pipeline project that greatly increased the amount of water available for reinjection.

Based on an internal assessment of the melded costs of power from the Geothermal Project and all other resources available to the members, NCPA believes its members will continue to be able to operate their electric utilities on a competitive basis, when compared to local investor-owned utility rates, while meeting all electric system obligations including those to NCPA. In March 2009, NCPA issued \$35,610,000 Geothermal Project Number 3 Revenue Bonds (2009 Series A). The proceeds were used to finance and operate the two NCPA 110 MW geothermal steam powered generating plants, Plant Number 1 and Plant Number 2. In 2012, NCPA issued \$12,910,000 in bonds for Plant Number 1 turbine upgrades. The City is obligated to pay its contractual share of 7.883 percent of the operating costs and debt service until it is fully satisfied, regardless of resulting cost or availability of energy. At June 30, 2022, the book value of this Project's plant, equipment and other assets was \$142,174,192 while its long-term debt totaled \$10,815,000 and other liabilities totaled \$115,453,351. The City's share of the Project's long-term debt amounted to \$852,546 at that date. At June 30, 2021, the book value of this Project's plant, equipment and other assets was \$136,571,820 while its long-term debt totaled \$15,505,000 and other liabilities totaled \$114,608,477. The City's share of the Project's long-term debt amounted to \$1,222,259 at that date.

Calaveras Hydroelectric Project

In July 1981, NCPA agreed with Calaveras County Water District to purchase the output of the North Fork Stanislaus River Hydroelectric Development Project and to finance its construction. Debt service payments to NCPA began in February 1990 when the project was declared substantially complete and power was delivered to the participants. Under its power purchase agreement with NCPA, the City is obligated to pay 12 percent of this Project's debt service and operating costs. In March 2018, NCPA refunded a portion of the outstanding Revenue Bonds with the \$70,215,000 2018 Hydroelectric Project Number One Revenue Bonds. The City's share of the 2018 bonds is 4.586%. In April 2019, NCPA refunded a portion of the outstanding Revenue Bonds with the \$39,250,000 2019 Hydroelectric Project Number One Revenue Bonds. In April 2022, NCPA refunded a portion of the outstanding Revenue Bonds with the \$132,310,000 2022 Hydroelectric Project Number One Revenue Bonds. At June 30, 2022, the book value of this Project's plant, equipment and other assets was \$266,160,000, while its long-term debt totaled \$228,492,698, and other liabilities totaled \$34,540,185. The City's share of the Project's long-term debt amounted to \$23,561,355 at that date. At June 30, 2021, the book value of this Project's plant, equipment and other assets was \$303,750,805, while its long-term debt totaled \$255,822,613, and other liabilities totaled \$44,430,637. The City's share of the Project's long-term debt amounted to \$25,946,605 at that date.

Note 8: Northern California Power Agency (NCPA) (Continued)

Combustion Turbine Project No. 2 (Steam Injected Gas Turbine Project)

The City is a participant in a 49.8 megawatt Steam Injected Gas Turbine project which was built under turnkey contract near the City of Lodi and declared substantially complete on April 23, 1996. In October 1992, NCPA issued \$152,320,000 of Multiple Capital Facilities Revenue Bonds to finance this project. In January 2010, NCPA refinanced the outstanding Capital Facilities Revenue Bonds by the issuance of the \$55,120,000 Capital Facilities Revenue Bonds Series A (2010 Refunding Series A). Under the NCPA power purchase agreement, the City is obligated to pay 36.50 percent of the debt service and operating costs for the Lodi unit.

The City's participation in procurement of natural gas for fuel for existing and new combustion turbine units was approved in 1993. Although there is currently no additional debt financing, the City and NCPA have committed to long-term payments for gas transmission pipeline capacity, and entered a purchase contract for natural gas. The City is obligated to pay 17.9218 percent of the natural gas purchase contract.

At June 30, 2022, the book value of this Project's plant, equipment and other assets was \$18,183,000, while its long-term debt totaled \$14,702,877 and other liabilities totaled \$2,640,200. The City's share of the Project's long-term debt amounted to \$5,366,550 at that date. At June 30, 2021, the book value of this Project's plant, equipment and other assets was \$22,057,438, while its long-term debt totaled \$19,315,661 and other liabilities totaled \$2,278,578. The City's share of the Project's long-term debt amounted to \$7,050,216 at that date.

c. NCPA Financial Information

NCPA's financial statements can be obtained from NCPA, 651 Commerce Drive, Roseville, California 95678.

Note 9: Risk Management

The Electric Fund, as a Fund of the City, is included in the City's risk management program. The City manages risk of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters by participating in the public entity risk pools described below and by retaining certain risks.

Public entity risk pools are formally organized and separate entities established under the Joint Exercise of Powers Act of the State of California. As separate legal entities, those entities exercise full powers and authorities within the scope of the related Joint Powers Agreements including the preparation of annual budgets, accountability for all funds, the power to make and execute contracts and the right to sue and be sued. Each risk pool is governed by a board consisting of representatives from member agencies. Each board controls the operations of the respective risk pool, including selection of management and approval of operating budgets, independent of any influence by member agencies beyond their representation on that board. Obligations and liabilities of these risk pools are not the City's responsibility.

The contributions made to the risk pools below equal the ratio of the respective member payrolls to the total payrolls of all entities participating in the same layer of each program, in each program year. Actual surpluses or losses are shared according to a formula developed from overall loss costs and spread to member entities on a percentage basis after a retrospective rating.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2022 AND 2021

Note 9: Risk Management (Continued)

a. Risk Coverage

General Liability, Property and Boiler and Machinery

The City is a member of the California Joint Powers Risk Management Authority (CJPRMA) which covers general liability claims, property, and boiler and machinery losses. Once the City's self-insured retention (SIR) is met, CJPRMA becomes responsible for payment of all claims up to the limit. Financial statements for the risk pool and more information may be obtained from CJPRMA, 3201 Doolan Road, Suite 285, Livermore, California 94551.

General Liability Coverage

The City has a self-insured retention (SIR) of \$1,000,000 per claim up to a \$40,000,000 limit.

Property Coverage

CJPRMA has purchased commercial insurance against property damage, boiler machinery claims. The City has a SIR of \$25,000 per claim up to a \$400,000,000 limit.

Roseville Energy Park Property Coverage

The City purchased commercial property insurance specifically to cover the Roseville Energy Park. The City has a SIR of \$250,000 per claim up to a \$200,000,000 limit.

Fiduciary Coverage

The City purchased fiduciary insurance specifically to cover the OPEB Trust. The SIR is \$25,000 per claim up to a \$3,000,000 limit.

Workers' Compensation

The City is also a member of the Local Agency Workers' Compensation Excess Joint Powers Authority (LAWCX), which covers workers' compensation claims up to \$5,000,000 and has excess coverage through CSAC-EIA up to the statutory limit. The City has a SIR of \$500,000 per claim.

Financial statements for the risk pool and more information may be obtained from LAWCX, 1750 Creekside Oaks Drive, Suite 200, Sacramento, California 95833.

Claims have not exceeded coverage at any time in the last three years.

Note 10: Contingent Liabilities

a. NCPA, Transmission Agency of Northern California and Western Area Power Administration

Under the terms of its NCPA joint venture agreement, the City is contingently liable for a portion of the bonded indebtedness issued by these agencies under take-or-pay or similar agreements, as discussed in Note 7. The City's estimated share of such debt outstanding at June 30, 2022 and 2021, was \$29,780,451 and \$34,219,080, respectively. Under certain circumstances, the City may also be responsible for a portion of the costs of operating these entities. Under certain circumstances, such as default or bankruptcy of other participants, the City may also be liable to pay a portion of the debt of these joint ventures on behalf of the other participants.

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 10: Contingent Liabilities (Continued)

The City is a member of the Transmission Agency of Northern California (TANC), a joint powers agency. The City is entitled to 2.1119 percent of TANC’s share of transfer capability in the California-Oregon Transmission Project (approximately 29.35MW). The City is responsible for a share of debt service on debt issued by TANC under a take-or-pay agreement, approximately \$400,000 annually through 2039. The City’s estimated share of debt outstanding at June 30, 2022 and 2021 was \$3,829,338 and \$3,878,289 respectively.

In addition, the City has a long-term obligation to the United States Department of Energy, Western Area Power Administration, for 4.58533 percent of the output of the Central Valley Project, California. This contract, also known as the Western Base Resource, obligates the City to make payments on a “take-or-pay” basis through December 31, 2024. The City expects to pay approximately \$4 million annually for the term of this contract. The City receives approximately 155,000 MWh of energy per year under average hydro and storage conditions.

b. Federal and State Grant Programs

The City participates in Federal and State grant programs. These programs have been audited by the City’s independent accountants in accordance with the provisions of the federal Single Audit Act as amended and applicable State requirements. No cost disallowances were proposed as a result of these audits; however, these programs are still subject to further examination by the grantors and the amount, if any, of expenditures which may be disallowed by the granting agencies cannot be determined at this time. The City expects such amounts, if any, to be immaterial.

c. Litigation

The City is subject to litigation arising in the normal course of business. In the opinion of the City Attorney there is no pending litigation, other than disclosed above, which is likely to have a material adverse effect on the financial position of the City.

d. Other Commitments

The Electric Fund had the following outstanding significant commitments at June 30, 2022 and 2021:

Projects	2022	2021
	Amount (in millions)	Amount (in millions)
Roseville Energy Park long-term service agreement	\$ 32.5	\$ 36.5
Net power purchase contracts	4.2	5.5
Natural Gas Forward Obligations	69.7	50.9
Renewable power purchase obligations	25.8	31.3
Advanced Metering Infrastructure	7.2	7.9

CITY OF ROSEVILLE ELECTRIC ENTERPRISE FUND

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
JUNE 30, 2022 AND 2021**

Note 11: Derivative Instruments

a. Summary of Notional Amounts and Fair Values

The City enters into contracts to hedge its price exposures to power and natural gas, and to procure energy supplies. These contracts are evaluated pursuant to GASB Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*, to determine whether they meet the definition of derivative instruments, and, if so, whether they effectively hedge the expected cash flows associated with interest rate and energy exposures.

The City applies hedge accounting for derivatives that are deemed effective hedges. Under hedge accounting, the increase (decrease) in the fair value of a hedge is reported as a deferred inflow or outflow of resources on the statement of net position. For the reporting period, all of the City's derivatives are considered effective hedges.

For energy derivatives, fair values are estimated by comparing contract prices to forward market prices quoted by third party market participants or provided in relevant industry publications. The following is a summary of the fair values and notional amounts of derivative instruments outstanding as of June 30, 2022 and 2021.

2022	Change in Fair Value		Fair Value		Notional	Level
	Classification	Amount	Classification	Amount		
Effective Cash Flow Hedges						
Pay Fixed SWAP, Natural Gas	Deferred Outflow	\$ 6,028,918	Derivative	\$ (4,190,270)	342,000 MWh	2
				<u>\$ (4,190,270)</u>		
2021	Change in Fair Value		Fair Value		Notional	Level
	Classification	Amount	Classification	Amount		
Effective Cash Flow Hedges						
Pay Fixed SWAP, Natural Gas	Deferred Outflow	\$ (3,471,986)	Derivative	\$ (10,219,188)	342,000 MWh	2
				<u>\$ (10,219,188)</u>		

b. Objective and Terms of Hedging Derivative Instruments

The objectives and terms of the City's hedging derivative instruments that were outstanding at June 30, 2022 and 2021, are summarized in the next table. The table is aggregated by the credit ratings of the City's counterparties. For counterparties having multiple ratings, the rating indicating the greatest degree of risk is used.

Hedge Cash Flows on NP15 Power	122,800 MWh	1/1/2022	12/31/2022	Average Cost/Unit at \$3.00	Macquarie Energy	A2	

c. Risks of Derivative Instruments

Credit risk – Credit risk is the risk of loss due to a counterparty defaulting on its obligations. The City seeks to minimize credit risk by transacting with creditworthy counterparties. Interest rate swap counterparties are evaluated at the time of transaction execution. The procedure prohibits the City from executing energy hedge transactions with counterparties rated lower than BBB by Standard & Poor's or Fitch rating services, or Baa2 by Moody's. Subsequent to entering into transactions, the credit ratings of one or more counterparties may deteriorate. If so, the City's credit risk management policies increase the amount of collateral that the counterparty must post with the City when the counterparty owes the City, thereby reducing credit risk associated with the decline in the counterparty's credit worthiness.

Termination risk – Termination risk is the risk that a derivative will terminate prior to its scheduled maturity due to a contractual event. Contractual events include bankruptcy, illegality, default, and mergers in which the successor entity does not meet credit criteria. One aspect of termination risk is that the City would lose the hedging benefit of a derivative that becomes subject to a termination event. Another aspect of termination risk is that, if at the time of termination, the mark-to-market value of the derivative was a liability to the City, the City could be required to pay that amount to the counterparty. Termination risk is associated with all of the City's derivatives up to the fair value amounts.
