Since purchasing a private water company back in early 1900s, Roseville has continued its track record of comprehensive water planning to maintain the quality, reliable services customers have grown to expect.

In the face of water supply challenges related to changing weather conditions and increasingly stringent state regulations, we have embarked on the Roseville Water Future Initiative – a proactive, comprehensive planning effort to diversify water supplies and maintain a high level of reliability for years to come.

Although Roseville's water supplies are more reliable than many California communities, factors creating uncertainty over how much water we can use are growing. We are controlling our own destiny, much like those before us, to ensure our community continues to thrive.
